Abstracts

ImageWare Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ImageWare Systems Inc. and its competitors. This provides our Clients with a clear understanding of ImageWare Systems Inc. position in the Industry.

The report contains detailed information about ImageWare Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ImageWare Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ImageWare Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ImageWare Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ImageWare Systems Inc. business.

About ImageWare Systems Inc.

ImageWare Systems, Inc. provides software-based identity management solutions, including biometric, secure credential, law enforcement, and enterprise authorization.

Products and Services

The company's identity management solutions are primarily focused around biometrics and secure credentials providing complete, cross-functional and interoperable systems. Its biometric and secure credentialing products provide interoperable solutions with features and functions required throughout the entire identity management life-cycle, enabling users the flexibility to make use of any desired options, such as identity proofing and enrollment, card issuance, maintenance and access control. The company categorizes its identity management products and services into three basic markets, including biometrics, secure credential, and law enforcement and public safety.

BIOMETRICS

IWS Biometric Engine

This is a biometric identity management platform for multi-biometric enrollment,

management and authentication, managing population databases of unlimited sizes without regard to hardware or algorithm. Searches can be 1:1 (verification), 1:N (identification), X:N (investigative) and N:N (database integrity). IWS Biometric Engine is technology and biometric agnostic, enabling the use of biometric devices and algorithms from any vendor, and the support of the following biometric types: finger, face, iris, hand geometry, palm, signature, DNA, signature, voice, 3D face and retina. IWS Biometric Engine is a solution from ImageWare Systems that is based on field-proven ImageWare technology solutions that have been used to manage millions of biometric records and is used for various applications including: criminal booking, background checks (civil and criminal), watch list, visa/passport and border control (air, land and sea), physical and logical access control, and other highly-secure identity management environments.

IWS Biometric Engine is scalable, and biometric images and templates can be enrolled either live or offline. The Biometric Engine is built to be hardware 'agnostic', and supports approximately 107 hardware capture devices and approximately 93 biometric algorithms.

The company's products provide government, law enforcement, border management, and enterprise businesses, with application-specific solutions that address specific government mandates and technology standards. It also provides the ability to integrate into existing legacy systems and expand based upon specific customer requirements. This enables users to integrate a solution or components as needed.

The application suite of products includes packaged solutions for Homeland Security Presidential Directive 12 (HSPD-12); Personal Identity Verification (PIV); border management; ePassport & eVisa; applicant identity vetting; mobile acquisition; physical access control; and single-sign-on and logical access control.

IWS PIV Management Application

ImageWare provides a set of Enterprise Server products within complete PIV solution, and these software products supply server-based features and functions, while the use case for PIV requires client-based presentation of PIV data and workflow. The IWS PIV Management Application supplies the Web-based graphical user interface that presents the user or client interface to the various server functions.

IWS PIV Middleware

The IWS PIV Middleware product, which is NIST certified and listed on the GSA

approved product list, is a library of functions that connect a card reader & PIV card on the hardware side with a software application. The library implements the specified PIV Middleware API functions that support interoperability of PIV Cards.

IWS Background Server

The IWS Background Server is a software application designed specifically for government and law enforcement organizations to support the first stage of biometric identity management functions, such as identity proofing and vetting. IWS Background Check Server automatically processes the submission of an applicant's demographic and biographic data to investigative bureaus for background checks prior to issuing a credential.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
