The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of IMI plc business.

## **About IMI plc**

IMI plc, a holding company, provides solutions and services for a range of industrial and retail customers. The company operates in three main business areas that include fluid controls, retail dispense and building products.

### **Fluid Controls**

The company's Fluid controls segment engages in the Severe Service, Fluid Power, and Indoor Climate business.

**Severe Service:** The company, through Controlling critical processes (CCI), engages in the severe service valves business. CCI's valves helps companies operate in the power, petrochemical, oil and gas, and pulp and paper facilities to minimize risk in the handling of corrosive liquids being used at high temperatures, pressures, and velocities.

**Fluid Power:** The company's Fluid Power business, Norgren, provides a range of sophisticated pneumatic and fluid control solutions. These solutions enable machine builders to optimize the design of their picking, placing, and positioning functions; and provide facility operators with clean, compressed air to power those machines.

Fluid Power provides essential pneumatic systems for original equipment manufacturers

in markets, such as commercial vehicles, medical, printing and packaging and in-plant automotive. Its major customers include Volvo, General Motors, Heidelberg and Krones.

In July the acquisition of Fluid Automation Systems (FAS), a technology Swiss company specializing in miniature solenoid valve solutions. FAS's specialized applications include respiration and in-vitro diagnostics. The acquisition of Syron, a U.S.-based specialist, in February 2005 increased its ability to provide end-of-arm tooling solutions to automotive manufacturers.

**Indoor Climate:** Indoor Climate services building and facility operators aiding energy conservation and cost control. Its indoor climate business designs and delivers products and services that is essential to the provision of problem-free, energy efficient and heating, ventilation and air conditioning systems. Its core brands are TA and Heimeier.

### Retail Dispense

The Retail Dispense segment engages in the Beverage Dispense and Merchandising Systems business.

**Beverage Dispense:** Beverage Dispense designs and manufactures still and carbonated beverage dispense systems to help multinational businesses sell in draught form their branded alcoholic and soft drinks. IMI's beverage dispense business operates through, Cornelius, which creates products and services for the beverage brand owners, retailers, and restaurants.

**Merchandising Systems:** Merchandising Systems designs and supplies point of purchase displays. The company's businesses, Cannon, Display Technologies, DCI Marketing, and Artform, allow the supply chain businesses to enable consumers to action at the point of purchase.

### Building Products

Building Products, comprises the Polypipe operations, which provide plastic pipes and building service products for the construction and building industry.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
