The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Inergetics, Inc. business.

### **About Inergetics, Inc.**

Inergetics, Inc., through its subsidiary, Millennium Biotechnologies, Inc., engages in the research, development, and marketing of specialized nutritional supplements, as an adjunct to medical treatments for select medical conditions, as well as for athletes. The company markets products which are targeted toward immuno-compromised individuals undergoing medical treatment for diseases, such as cancer, as well as wound healing and post-surgical healing and geriatric patients in long-term care facilities.

The company manufactures and markets three proprietary product lines and 9 SKU's to 2 separate target markets. Three product lines form the company's product portfolio they include, Resurgex Select, Ready-To Drink Resurgex Essential, and Ready-To-Drink Resurgex Essential Plus.

#### **Resurgex Select**

Resurgex Select is a whole foods-based nutritional product that is designed to be used throughout the course of cancer treatment (chemotherapy and radiation), as many times patients lose weight and cannot consume adequate nutrition. This product combines dietary fiber (3 g), low sugar (5 g), and high protein (15 g) with no added antioxidants to be a high-calorie (350 calorie) supplement. It is available in three flavors (Vanilla Bean,

Chocolate Fudge, and Fruit Smoothie) and each can be mixed with water, milk, juices, or in soft cold foods, such as yogurt, apple sauce, or pudding.

## Surgex

Surgex ([www.surgexsports.com](http://www.surgexsports.com)) is a nutritional support formula that aims to address the concerns of many elite athletes who suffer from symptoms, such as (fatigue, lean muscle loss, lactic acid buildup, oxidative stress, and stressed immune systems).

The company has tested its sports nutrition formula products at Rutgers University in New Jersey, among both the Men's Division I Soccer Team and the Men's Division I Football Team in two separate single-blind placebo-controlled studies.

## Resurgex Essential

Resurgex Essential has 250 whole food calories containing no corn syrup or corn oil. The product also contains fruit and vegetable extracts, and FOS Fiber. Resurgex Essential and Resurgex Essential Plus represent company's Ready-to-Drink product line and are being sold into the Long-Term Care geriatric markets.

## Competition

The products that most directly compete with the company's products in the adult nutrition market are produced by mainstream manufacturers, including Boost by Nestle, Ensure by the Ross Product Division of Abbott Laboratories Inc., and Carnation Instant Breakfast by Nestle.

## History

The company was founded in 1967. It was formerly known as Millennium Biotechnologies Group, Inc. and changed its name to Inergetics, Inc. in March 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
