term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Cyient Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cyient Limited business.

About Cyient Limited

Infotech Enterprises Limited operates as a software services company with a focus on geographic information systems, engineering design, and information technology (IT) services. Its range of services include digitization of drawings and maps, Photogrammetry, CAD / CAE, design and modeling, repair development engineering, reverse engineering, application software development, software products development, consulting and implementation. Infotech also offers application lifecycle solutions. The company specializes in software services and solutions for the manufacturing, utilities, telecommunications, transportation and logistics, and government and financial services.

In March 2005, the company acquired Tele Atlas India Private Limited, a wholly owned subsidiary of Tele Atlas BV, Netherlands. Infotech has also entered into a long-term services agreement for providing Database and Software Solutions to Tele Atlas.

Geospatial Services (GIS)

The company is a global provider of integrated GIS solutions to the utilities, telecommunications, transportation and civil government verticals. Infotech's services range from data management and software development to implementation, system

integration and consultancy services. Its GIS Products include GeoLOGIC, RouteView Range, Digital Pages, SCANA, Hotspot Detective, ADC WorldMap and Map-In-A-Box.

The company offers Spatial Data Management Services, Photogrammetry and Image Processing, Spatial Application Management Services, Managed Application Services to all clients who have had a bespoke application built for them; and Enterprise Application and Integration. Infotech also provides a range of training courses in the latest GIS software.

Engineering Design

The company is an integrated offshore engineering outsourcing partner for the manufacturing industry. The Engineering Services division provides engineering solutions and has focus in aerospace, automotive and industrial machinery segments.

The company offers design support, design consultancy, manufacturing support, tool design, customer support engineering, technical publications solutions; and engineering application development from legacy systems to Windows OS environment, CAD and CAE applications.

IT Services

Infotech provides services in the areas of ERP, EAI, Business Intelligence, e-biz, Web enabling of business processes, as well as maintain/enhancement of legacy systems, Corporate Portals and Knowledge Management. The company offers application development, application migration, enterprise application integration, enterprise security, managed application services, product development services, product services, data warehousing / mining, and consulting. Its platform expertise includes IBM, Microsoft, Plum Tree, Seebeyond, SAP, Oracle, SUN and BEA, and Documentum.

Market

The company has its development facilities in India and serves a global customer base through subsidiaries in the UK (Infotech Enterprises Europe), Germany (Advanced Graphics Software GmbH), and USA (Infotech Software Solutions, Inc.). Infotech has also developed a strategic partner network to serve markets in Europe, Japan, Australia, the Middle East and the Asia-Pacific region.

Strategic Alliance

Hindustan Aeronautics Limited has entered into a partnership with Infotech Enterprises, Ltd. (IEL) for design and validation services for aero engines. The new 50-50 joint venture is called Infotech HAL Limited.

In 2005, the company entered into a strategic alliance with Ten Sails to offer a mix of solutions, services and technology to the global Smallworld user community.

The company and Hindustan Aeronautics Limited have formed a joint venture to offer engineering design services for the aerospace sector, with focus on aero-engines, technical publications and work for original equipment manufacturers.

Alten SA has entered into a strategic partnership with Infotech Enterprises, Ltd. Under the partnership, the two organizations would provide engineering solutions to EADS.

History

Infotech Enterprises Limited was founded in 1991.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
