Abstracts

Inmet Mining Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Inmet Mining Corporation and its competitors. This provides our Clients with a clear understanding of Inmet Mining Corporation position in the Industry.

The report contains detailed information about Inmet Mining Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Inmet Mining Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Inmet Mining Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Inmet Mining Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Inmet Mining Corporation business.

About Inmet Mining Corporation

Inmet Mining Corporation, a global mining company, produces copper, zinc and gold. The company has operations and development projects in Turkey, Finland, Canada, Papua New Guinea, Spain and Panama.

Mines

Cayeli: The company owns a 100% interest in Cayeli, a copper and zinc mine located in the province of Rize near the Black Sea coast of northeastern Turkey. The surface projection of the ore body covers an area of approximately 203 hectares.

Pyhasalmi: The company holds a 100% interest in Pyhasalmi, a copper and zinc mine located in central Finland. Pyhasalmi's mining concession consists of two leases: a mining lease of 59.2 hectares, covering the surface expression of the ore body and the mine itself and an auxiliary lease of 352.4 hectares, covering other areas used for mining purposes. Pyhasalmi holds both mining concession leases and holds approximately 3,000 hectares of other exploration claims throughout Finland.

Troilus: The company also holds a 100% interest in the Troilus property, a gold and copper mine, located in northern Quebec, Canada. The property includes: one mining

lease covering an area of 840 hectares; 481 unpatented claims covering a total area of 7,511 hectares surrounding and adjacent to the mining lease; and five surface leases over an area of 1,502 hectares.

Ok Tedi: The company holds a 18% interest in Ok Tedi, a copper and gold mine located in the Star Mountains Region in Papua New Guinea. The ore body consists of a massive copper and gold porphyry deposit.

Las Cruces: The company holds a 70 % interest in the Las Cruces copper project located in the Sevilla Province of southern Spain.

Petaquilla: the company also holds a 100% interest in the Petaquilla project, an undeveloped copper, gold, and molybdenum property located 120 kilometers west of Panama City and 20 kilometers from the Caribbean Sea coast, in the district of Donoso, Colon province, in the Republic of Panama. The concession consists of four zones totaling 13,600 hectares.

Significant Events

In November 2009, GEO Minerals Ltd. has signed two separate option agreements with Inmet Mining Corporation (Inmet). The contract has been signed to explore the firm's porphyry copper projects located in the Arizona porphyry copper province.

On January 8, 2010, Millrock Resources Inc. announced that it has signed a letter of intent to enter into an Option to Joint Venture Agreement with Inmet Mining Corporation concerning Millrock's San Jose and Dry Mountain claims south of the town of Safford and southwest of Morenci, Arizona, USA.

History

Inmet Mining Corporation was founded in 1987.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
