Such information creates your awareness about principal trends of Innospec Inc. business.

About Innospec Inc.

Innospec Inc. engages in the development, manufacture, blending, and marketing of fuel additives and other specialty chemicals. The company's products are sold primarily to oil refineries and other chemical and industrial companies worldwide.

Segments

The company divides its business into three segments, including Fuel Specialties, Active Chemicals, and Octane Additives.

Fuel Specialties

The Fuel Specialties business develops, produces and markets a range of specialty chemical products, used as additives to a range of fuels. The business's products are used in the operation of automotive, marine and aviation engines, power station generators, heating, and diesel particulate filter systems.

Active Chemicals

The Active Chemicals business provides technology-based solutions for its customers' processes or products focused in the personal care; household, industrial & institutional;

and fragrance ingredients markets.

Octane Additives

The Octane Additives business produces tetra ethyl lead (TEL). The Octane Additives business comprises sales of TEL for use in automotive gasoline and trading in respect of its environmental remediation business. Its environmental remediation business assists customers to manage the clean up of the associated redundant plants as refineries complete the move from leaded fuel.

Customers

Fuel Specialties: The company's customers are multinational oil companies and fuel retailers.

Active Chemicals: The company's customers range from multinational companies and manufacturers of personal care and household products, to specialty chemical manufacturers operating in niche industries.

Octane Additives: Sales of TEL for use in automotive gasoline are made principally to the retail refinery market, which consist of state owned refineries focused in the Middle East and Africa. In 2009, the company its major customer is Royal Dutch Shell plc and its affiliates (Shell).

Significant Events

On April 13, 2010, Innospec Inc. announced the launch of a major new collaborative venture with Huntsman Corporation in the personal care market. Under an agreement, Innospec and Huntsman would co-operate to continue developing and to commercialize Innospec's mild surfactant: Iselux.

History

The company was founded in 1938. It was formerly known as Octel Corp. and changed its name to Innospec Inc. in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need

2-3 days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
