Abstracts

InnovaCom, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between InnovaCom, Inc. and its competitors. This provides our Clients with a clear understanding of InnovaCom, Inc. position in the Industry.

The report contains detailed information about InnovaCom, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for InnovaCom, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The InnovaCom, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes InnovaCom, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of InnovaCom, Inc. business.

About InnovaCom, Inc.

InnovaCom Inc (the company) was incorporated in Florida in 1993, as a research and development company. The Company is in transition from a development stage company to a manufacturing stage company, focusing on digital video compression, transmission, and processing technology compliant with MPEG-2 standards. In March of 1996, the Company began to emphasize the development of broadcast quality encoded video utilizing the Motion Picture Experts Group (MPEG) second generation standard for video and audio compression (MPEG-2), including development of a single-chip encoder termed the "Gecko" chip. Development of the single-chip encoder was terminated in June 1998, but development of other MPEG-2 related products continued.

Products and Technology

The Company develops core technologies and methodologies and integrates complimentary third party products for digital video compression, transmission, and processing technology applications. The Company adheres to MPEG-2 non-proprietary "open standards" to enhance flexibility and market appeal for the Company's products.

TransPEG[™]: Until recently, video transmission over network was restricted to low frame counts, small viewable windows, and low pixel counts because of data rate

limitations within the carriers. Alternatively, carriers with the bandwidth to achieve higher quality video were too expensive for widespread usage.

The Company is currently marketing four such transmission products in its TransPEG product line. These are interchangeable digital multi-channel transmissions systems that compress video, transmit in standard carrier formats, and decompress at the viewer's location. TransPEG products are available for a variety of standard carriers (ATM, T1/E1, etc.), support unicast, multicast and broadcast transmission, and feature web based controls.

DVD Impact[™]: DVD Impact is a DVD premastering suite, which integrates MPEG-2 video compression developed by the Company with a number of software tools developed by third parties and targets corporate and "prosumer" users for the design of custom DVD's. DVD Impact is currently shipping.

DV-2110: Currently under development, the DV-2110 is an MPEG-2 encoder board, designed to act as the system interface, I/O manager, and host for third party MPEG-2 encoder chips. The Company intends to imbed the DV-2110 in subsequent versions of its TransPEG and DVD Impact products, and to sell the board as a stand-alone component, or packaged with certain Company-developed software as an OEM product to customers in markets that the Company does not currently service with its own system level products.

Competition

The Company's competitors include Spruce Technologies, Inc., Sonic Solutions, Minerva Systems, Inc., FVC.COM, Inc. and Lucent Technologies, Inc.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

InnovaCom, Inc. Fundamental Company Report Including Financial, SWOT, Competitors and Industry Analysis

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources Financial

Physical

Technological

Organizational

Intangible resources Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
