Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Innuity, Inc. business.

About Innuity, Inc.

Innuity, Inc., a Software as a Service (SaaS) company, engages in the design, acquisition, and integration of applications to deliver solutions for small business. The company delivers information system solutions through its Innuity Velocity Internet technology platform, which provides small businesses the opportunity to choose applications that are right for their businesses — individually or as an integrated package.

Divisions

The company's business has two divisions: Promotion and Commerce, each of which is focused on a business process. The applications and solutions offered by Promotion division help small businesses market and promote their products and services, while the offerings of Commerce division can facilitate and improve a small business' selling processes and transaction processing capabilities.

Products and Services

Promotion Division

The company's Promotion division connects businesses with customers who are most

likely to buy their particular products and services. The Promotion division offers small business online marketing and search engine marketing services.

Small Business Online Marketing

The company's small business online marketing offerings provide solutions that comprehensively and immediately promote small businesses online and can help to rapidly build strong customer bases. With online marketing solutions, current and new customers of small businesses can find small businesses online quickly through local search results and pay-per-click ads; learn about small businesses' product and service offerings through clear, compelling and easy-to-navigate Web sites; and purchase a merchant's products and services online.

Yellow Page Guides: Local Online Yellow Page Directory: It provides enhanced local listing on its own local search property www.yppguides.com for small businesses to be found online in the Yellow Page Guide for their appropriate city.

LeadConnect-Local Online Business Profiles: It drives local search rankings for customers in the major search engines. This service develops enhanced online local business profiles, places customized business profiles in one centralized location and automatically distributes these business profiles to major search engines and yellow page directories including Google, Yahoo, MSN and YellowPages.com.

Pay-Per-Click Advertising: It identifies, analyzes and selects high-impact keywords; buys sponsored listings and advertising space in places such as Google for identified keywords and keyword phrases; and rapidly delivers qualified leads.

Search Engine Optimization: It identifies, analyzes and selects high-impact keywords, creates targeted landing pages for each keyword phrase and recruit 3rd party back links to the landing pages with the intention of delivering top natural search rankings for the selected keyword phrases.

Business and eCommerce Web site Services

The company's business and eCommerce Web site services products include various noteworthy features such as approximately 100 design templates for website creation. These fully-functional Web site templates include features such as location maps, dynamic driving directions, reservations, business email and customer registration forms — all of which allow a customer to create a professional website in minutes.

Another feature includes its Web site editing tools that enable its small business customers to edit, update and enhance their websites without any additional software or specialized computer skills, and without having to hire a professional webmaster to manage their Web sites for them.

Commerce Division

The company's Commerce division provides the operational capability for processing, managing and supporting commerce transactions between small businesses, their online and offline customers, vendors and business partners. The Commerce division offers Merchant Services to its small business customers.

Merchant Services

The company's Merchant Services offerings deliver payment and processing solutions for merchants — bringing faster credit capabilities to its customers. Providing the functionality and support needed to conduct bank card service

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
