Abstracts

Inolife Technologies, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Inolife Technologies, Inc. and its competitors. This provides our Clients with a clear understanding of Inolife Technologies, Inc. position in the Industry.

The report contains detailed information about Inolife Technologies, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Inolife Technologies, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Inolife Technologies, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Inolife Technologies, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Inolife Technologies, Inc. business.

About Inolife Technologies, Inc.

InoLife Technologies, Inc., through its subsidiary, Inovet, Ltd., engages in the identification, development, integration, and marketing of healthcare-based products and services, which provide solutions for both humans and companion animals.

The company operates in two lines of businesses include the development of veterinary oncological treatments (cancer in animals) and to provide DNA testing for paternity tests and to screen for certain genetic diseases. It also licenses the DNA test kits.

Additionally, the company intends to identify, develop, and market multi-faceted, human diagnostic product lines marketed towards both potential professional medical and retail customers.

Companion Animal Healthcare

The company, through its wholly-owned subsidiary Inovet, Inc., engages to identify, facilitate, and promote options for cancer therapy in companion animals. InoVet, Inc. provides veterinary healthcare products and services. The InoVet, Inc. primarily engages in introducing and developing bone marrow transplantation and other cancer treatment procedures to benefit companion animals (dogs and cats) that are diagnosed with lymphoma, other types of cancers, and other diseases.

InoVet, Inc. intends to establish treatment facilities for the treatment and further development of veterinary oncology canine cancer treatment centers and research in Connecticut, Florida, and Texas. InoVet, Inc. also intends to establish a DLA typing registry that would contain a registry of potential canine bone marrow donors, as well as their family lineage that can be directly utilized for DNA matching purposes of recipient canines receiving bone marrow transplants.

Human Healthcare

Molecular tests are used to diagnose disease and disease susceptibility, in prenatal genetic assessments, in tissue typing for organ transplantation, and to screen for inherited diseases. The company's primary DNA testing and analysis products for humans are as follows.

IHP DNA Predisposition Test and Analysis – The company's DNA predisposition testing service that would reveal an individual's genetic predisposition for 25 diseases and conditions.

IHP Ancestral Origins Test – The company's DNA ancestry test, an individual's DNA profile is established and then compared against hundreds of global populations and fourteen anthropological regions whose collective genetic information is known and scientifically validated.

IHP Paternity Test – The company's DNA paternity testing system is a premium 16-marker DNA test that utilizes the powerful standard DNA testing parameters in the industry.

IHP Parental Drug Testing Kit – This kit is a drug testing kit that is simple to perform, together with reporting that is clearly presented.

Customers

The principal users of the company's products and services that it targets include healthcare providers, including physicians, veterinarians, hospitals, and outpatient facilities, in addition to individuals with a direct need for the solutions it provides.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
