The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Insignia Systems Inc. business.

About Insignia Systems Inc.

Insignia Systems, Inc. markets in-store advertising products, programs and services to retailers and consumer packaged goods manufacturers and retailers.

Products

Insignia's POPSign Program

Insignia's POPSign program is an in-store, shelf-edge, point-of-purchase advertising program that enables manufacturers to deliver product-specific messages in designs and formats that have been pre-approved and supported by participating retailers. Insignia POPSigns deliver vital product selling information from manufacturers, such as product uses and features, nutritional information, advertising tag lines and product images. The company collects and organizes the data from manufacturers and retailers, then formats, prints and delivers the signs to retailers for distribution and display. Store personnel place the signs at the shelf for two-week display cycles.

The Impulse Retail System and SIGNright Sign System

The company sells laser printable cardstocks and label supplies in various sizes and

colors that are used to include pre-printed artwork, such as a retailer's logo.

Stylus Software

Stylus is a PC-based software application used by retailers to produce signs, labels, and posters. The Stylus software allows retailers to create signs, labels and posters by manually entering the information or by importing information from a database.

Laser Printer and Vinyl Label Supplies

The company provides an offering of laser printable cardstock and vinyl labels to retailers for their in-store signage and shelf-edge product information needs. Products include adhesive and non-adhesive supplies in a variety of colors, sizes and weights.

Marketing and Sales

The company directly markets the Insignia POPSign program to food and drug manufacturers and retailers. It sells cardstock and supplies related to these systems to the U.S. and international customers. The company markets its Stylus software in the United States and internationally primarily through resellers that integrate Stylus as an Open Database Connectivity design and publishing component into their retail data and information management software applications.

Customers

The company's customers include Valassis and General Mills, Inc.

Competition

The company competes with News America Marketing In-Store, Inc.

History

Insignia Systems, Inc. was founded in 1990.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
