The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of InsWeb Corp. business.

About InsWeb Corp.

InsWeb Corporation operates an online insurance marketplace that electronically matches consumers and providers of automobile, homeowners and term life insurance. The company's marketplace enables consumers to research insurance-related topics, search for, analyze and compare insurance products, and apply for and receive quotes for automobile, property, health, term life, and small business insurance.

The company provides consumers with various interactive Web site features and insurance-related information, including tools to help consumers estimate their coverage requirements for auto and term life insurance; research capabilities to help consumers review the financial strength of insurance companies nationwide; answers to frequently asked questions on insurance; articles on various insurance and personal finance topics; and glossaries of insurance-related terms.

Insurance Products

Insurance companies participating in the company's online insurance marketplace offer automobile and homeowners insurance. In addition, it has contractual relationships with third-party providers for term life, small business, renters, condominium insurance, home warranty, RV, motorcycle, critical illness and health insurance.

Automobile Insurance: As of December 31, 2009, the company's online marketplace generated leads or clickthroughs to insurance providers in all 50 states, plus the District of Columbia.

Property Insurance: As of December 31, 2009, the company's online marketplace generated leads for property insurance to providers in all 50 states, plus the District of Columbia.

Term life Insurance: As of December 31, 2009, the company's online marketplace generated leads for term life insurance to providers in all 50 states, plus the District of Columbia.

Other Products: The company's online marketplace also allows consumers to shop for term life, small business, renters and condominium insurance, as well as home warranty, motorcycle and RV insurance, and health and critical illness insurance in certain states.

Agent Directory: As of December 31, 2009, the company's online marketplace offered both subscription and display advertising on its agent directory pages. These pages display listings of various insurance companies and eight local agents for the consumer to contact.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
