## Abstracts

International Baler Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between International Baler Corp. and its competitors. This provides our Clients with a clear understanding of International Baler Corp. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about International Baler Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for International Baler Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The International Baler Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes International Baler Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of International Baler Corp. business.

## **About International Baler Corp.**

International Baler Corporation manufactures and sells baling equipment, which are used to compress scrap metal, corrugated boxes, newsprint, aluminum cans, plastic bottles, and other solid waste.

### **Products**

The company offers various balers, including general purpose horizontal and vertical balers; specialty balers, such as those used for textile materials, used clothing, aluminum cans, 55-gallon drums and synthetic rubber; and accessory equipment, such as conveyors, fluffers, bale tying machines, and plastic bottle piercers.

### **General Purpose Balers**

These balers are designed for general purpose compaction of waste materials. They are manufactured in either vertical or horizontal loading models. Materials that are handled by this equipment include paper, corrugated boxes, and miscellaneous solid waste materials. These balers range in bale weight capacity from approximately 300 to 2,000 pounds.

## Specialty Balers

Specialty balers are designed for specific applications which require modifications of the general baler configuration. The scrap metal baler is designed to form a bale, referred to as a scrap metal 'briquette' of specified size and weight. The rubber baler is designed to apply pressure in such a way as to compress the synthetic rubber into a self-contained bale that does not require tying. The drum crusher baler enables collapsing a standard 55-gallon drum into a 'pancake' approximately 4 to 8 inches high, which also serves to contain other remaining contents. The textile baler is capable of compressing and baling loose fibers, which do not ordinarily adhere to each other under pressure. In addition, a double chamber baler is designed for use by the clothing and textile industries.

## Accessory Equipment

The company manufactures and markets various accessory equipment items, including conveyors, which carry waste from floor level to the top of horizontal balers; extended hoppers on such balers; rufflers, which break up material to improve bale compaction; electronic start/stop controls; and hydraulic oil coolers and cleaners.

## Customers

The company sells its products in the United States and Europe, the Far East, and South America to manufacturers of synthetic rubber and polymers, plastic recycling facilities, power generating facilities, textile mills, paper mills, cotton gins, supermarkets and other retail outlets, paper recycling facilities, and municipalities.

The company's general purpose balers are sold primarily in the eastern United States to such end users as waste producing retailers (supermarkets and liquor stores), restaurants, manufacturing and fabricating plants, bulk material producers, nuclear plants, and solid waste recycling facilities. Specialty balers are sold throughout the United States and Europe, the Far East, and South America to manufacturers of rubber and polymers, plastic recycling facilities, paper recycling facilities, textile mills, and power generating facilities.

## History

The company was founded in 1975. It was formerly known as Waste Technology Corp. and changed its name to International Baler Corporation in 2009.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
