International Lottery & Totalizator Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between International Lottery & Totalizator Systems Inc. and its competitors. This provides our Clients with a clear understanding of International Lottery & Totalizator Systems Inc. position in the **Computers and Electronic Equipment Industry**.

- The report contains detailed information about International Lottery & Totalizator Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.
- Another part of the report is a SWOT-analysis carried out for International Lottery & Totalizator Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.
- The International Lottery & Totalizator Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.
- In the part that describes International Lottery & Totalizator Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of International Lottery & Totalizator Systems Inc. business.

### About International Lottery & Totalizator Systems Inc.

International Lottery & Totalizator Systems, Inc. engages in the design, manufacture, sale, management, support, and service of computerized wagering systems and terminals for the online lottery and pari-mutuel racing industries worldwide.

## Products and Services

The company designs, develops, and provides voting and gaming processing systems for public and private organizations. It provides a range of customized software, hardware, technical support and site management for its customers' voting or gaming operations.

### Wagering Systems

The company's wagering systems include the following components: a central computer installation that includes, computer hardware and a commercially available operating system used in conjunction with its proprietary DataTrak application software; the Datamark and Intelimark families of point-of-sale terminals; and the communication network to interface the terminals to the central computer installation.

**Wagering Application Software:** The principal component of the company's wagering system is the DataTrak central system software which controls the operation of the entire system. It performs the following functions: maintains communication with each point-of-sale terminal; provides security; logs activity and wagers; populates a commercially available database in real time with high level security; identifies the set of winning tickets using the lottery game draw results; calculates prize pool amounts; allows the use of other third party software products to analyze and compile management data; and provides mission critical fault tolerance.

**Datamark and Intelimark Terminals:** The company has two families of terminals: the Datamark and the Intelimark, both of which are: based on PC architecture and utilize commercially available software operating systems; and programmed using standard software languages.

The company's new version in the Datamark family is the XClaim terminal. . Its optical mark reader and thermal printer require little or no adjustments or maintenance. There are two terminals in the Intelimark family: The Intelimark incorporates commercially available hardware and software from strategic partners. The Intelimark FLX is a touch screen lottery terminal.

**Spare Parts:** The company also sells spare parts for use in the repairs and maintenance of the terminal population.

**Software and Technical Support Agreements:** The company offers software maintenance agreements which feature: telephone hot line and e-mail support; standard upgrades and patches; and primary technical support for third party software products. It also offers software modifications and enhancements to satisfy specific customer requirements.

### Voting System Products

The company has developed certified optical scan voting systems and election management software (EMS) that provides precinct tabulation, ballot review, and audio voting capability. It also offers the Inkavote Plus Precinct Ballot Counter (PBC) system and OpenElect digital optical scan election system. The company's OpenElect voting systems consist of the following components:

**OpenElect Central Suite** is a Linux-based suite of software applications, including the Ballot Layout Manager, Election Manager, Election Server, Tabulator Client, Tabulator, and Tabulator Reports working together to define and configure an election;

**OpenElect Voting Optical Scan** is a paper-based digital optical scan voting system that both validates and tabulates ballots at each precinct, providing integrity, confidence, and high levels of physical and software security;

**OpenElect Voting Interface** is a multi-faceted voting device which has features to accommodate voters with

disabilities and facilitate early voting, ranked choice voting and non-geographical use; and

OpenElect Voting Central Scan is a digital scan voting unit designed to tabulate early vote, absentee, provisional and recounted ballots at a jurisdiction's central operation center.

The InkaVote Plus optical scan voting system is an application consisting of its PBC and EMS components. It provides a path to the replacement of other voting systems.

Election Management Software (EMS): The EMS consists of the Ballot Data Generator and the Vote Tabulator software applications that work together to perform the following functions: define and configure an election; program the InkaVote Plus PBCs; provide camera ready ballot pages in PDF format; compile and tabulate vote results; and generate required reports. The EMS is intended to provide control of each step of the election process from ballot layout to report generation. The EMS creates the election specific database from information that can be imported manually and/or from an .XML file.

Precinct Ballot Counter: The PBC, designed to read and validate ballots, is a precinct based optical scan device which includes a color touch screen operator interface, InkaVote ballot reader and validator, and precinct report printer.

## Competition

The company's principal competitors in gaming operations include Gtech, a subsidiary of Lottomatica, SpA (an Italian company); Scientific Games Corporation (a U.S. company); IntraLot, S.A. (a Greek company); Wincor-Nixdorf (a German company); KEBA, GesmbH & Co. (an Austrian company); Sagem (a French company); and Olivetti Tecnost (an Italian company). Its principal competitors in voting operations include Election Systems & Software, Inc.; Hart InterCivic; and Dominion Voting Systems Corporation.

## History

International Lottery & Totalizator Systems, Inc. was founded in 1978.

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.
