The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of International Shipholding Corp. business.

About International Shipholding Corp.

International Shipholding Corporation, through its subsidiaries, operates a fleet of the U.S. and International flag vessels that provide international and domestic maritime transportation services to commercial and governmental customers primarily under medium to long-term time charters or contracts of affreightment. As of March 05, 2010, the company owned or operated 27 ocean-going vessels and related shoreside handling facilities.

The company's fleet is deployed by its principal operating subsidiaries, Central Gulf Lines, Inc. (Central Gulf), LCI Shipholdings, Inc. (LCI), Waterman Steamship Corporation (Waterman), CG Railway, Inc. (CG Railway), Enterprise Ship Company, Inc. (ESC), and East Gulf Shipholding, Inc. (EGS). Other subsidiaries provide ship charter brokerage, agency and other specialized services.

Segments

Time Charter Contracts

Time charters are contracts by which the company's charterer obtains the right for a

specified period to direct the movements and utilization of the vessel in exchange for payment of a specified daily rate, but the company retains operating control over the vessel. The company's Time Charter Contracts include contracts with Far eastern shipping companies for 10 PCTCs, with an electric utility for a conveyor-equipped, self-unloading Coal Carrier, and with a mining company providing ocean transportation services at its mine in Papua, Indonesia. Also included in this segment are contracts under which the MSC charters three RO/ROs that are under an operating contract, and contracts with another shipping company for three container vessels.

Contract of Affreightment (COA)

For this type of contract, the company undertakes to provide space on its vessel for the carriage of specified goods or a specified quantity of goods on a single voyage or series of voyages over a given period of time between named ports or within certain geographical areas in return for the payment of an agreed amount per unit of cargo carried. The company's COA segment includes one contract, which is for the transportation of molten sulphur.

Rail-Ferry Service

This service uses the company's two Special Purpose vessels, which carry loaded rail cars between the U.S. Gulf and Mexico. Each vessel has a capacity for 113 standard size rail cars. With departures every four days from Coatzacoalcos, Mexico and the U.S. Gulf, it offers with each vessel a three-day transit between these ports and provides a total of 90 trips per year in each direction when both ships are operating.

Other

This segment consists of operations that include more specialized services and ship charter brokerage and agency services.

History

International Shipholding Corporation was founded in 1978.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
