Abstracts

International Wire Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between International Wire Group Inc. and its competitors. This provides our Clients with a clear understanding of International Wire Group Inc. position in the [Electrical Equipment Industry](#).

The report contains detailed information about International Wire Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for International Wire Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The International Wire Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes International Wire Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of International Wire Group Inc. business.

About International Wire Group Inc.

International Wire Group, Inc. manufactures and markets wire products, including bare and tin-plated copper wire, engineered products and high performance conductors, for other wire suppliers, distributors and original equipment manufacturers.

The company's products include various copper wire configurations and gauges with a variety of electrical and conductive characteristics and are utilized by customers primarily in the aerospace, appliance, automotive, electronics and data communications, general industrial/energy and medical device industries. The company manufactures and distributes its products at 19 facilities located in the United States, Belgium, France and Italy.

Segments

The company operates its business in the three segments: Bare Wire, Engineered Wire Products, and High Performance Conductors.

Bare Wire: The company offers bare and tin-plated copper wire products (or conductors) that are used to transmit digital, video and audio signals or conduct

electricity and are sold to a customer base of approximately 1,000 insulated wire manufacturers and various industrial OEM's for use in electronics and data communications, general industrial, energy, appliances, and automotive markets.

Engineered Wire Products — Europe: The company offers bare copper wire products that are used to conduct electricity either for power or for grounding purposes and are sold to a customer base of various OEM's for use in electrical appliances, power supply, aircraft and railway and automotive markets.

High Performance Conductors: High performance conductors segment manufactures specialty high performance conductors which include tin, nickel and silver-plated copper and copper alloy conductors including standard and customized high and low temperature conductors as well as specialty film insulated conductors and miniature tubing products. These products are used by various customers in the commercial and military aerospace and defense, electronics and data communication, industrial and automotive and medical electronics and device markets.

Products and Markets

Bare Wire segment

The company's external sales of bare wire products are primarily to wire insulators, who apply insulating materials to the bare wire through an extrusion process. These wire insulators are located primarily in the United States, Canada and Mexico and sell their insulated wire to a variety of customers in the following markets: appliance; automotive; electronics and data communications, including broadcast/video, audio/microphone/sound for entertainment, medical, safety and security control, local area network (LAN) and computer system applications; and industrial/energy, including heating, ventilating and air conditioning (HVAC), circuit protection, digital and cellular phone tower, elevator, mining and oil exploration, mass transit, utility power distribution, wind turbine, oil and water well, transformers and fuse link, welding and irrigation applications. The company manufactures an array of bare and tin-plated copper conductors including the following:

Single End Wire: Single end wire is an individual wire drawn to the customer's size requirements ranging from .16 to .00157 inches in diameter. Single end wire is capable of transmitting signals or electrical currents between two points and is used to transmit digital, video and audio signals or low voltage current in a variety of wire products used in motor controls, local area networks, security systems, television or telephone

connections and water sprinkler systems.

Stranded Wire: Stranded wire is comprised of single end wires twisted together in a specific geometric pattern that preserves each individual wire's relative position for the length of the wire. Stranded wire, like single end wire, transmits digital, video and audio signals or low voltage current. Stranded wire is used in products that connect peripherals to the personal computer (PC), connect the internal components of the PC, and control HVAC, security and other functions inside buildings. In addition, stranded wire is used in antilock braking systems, airbag systems, utility power distribution and circuit b

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
