The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Internet America, Inc. business.

About Internet America, Inc.

Internet America, Inc., an Internet service provider (ISP), focuses on providing wireless high-speed broadband Internet in rural markets.

The company offers broadband services to both business and residential customers within its network footprint without the use of terrestrial lines. This allows the company to cover a rural or suburban geographical area. The company's wireless broadband Internet services are offered utilizing fixed point-to-multipoint wireless technology in both licensed and unlicensed spectrum. It has obtained a nationwide license for 3.65 GHz bandwidth. The company serves approximately 8,200 wireless broadband Internet subscribers. As of June 30, 2010, it served approximately 25,900 total subscribers in Texas.

The company provides voice over Internet protocol (VoIP) and hosted VoIP PBX services to its embedded customer base throughout Texas. The access networks which it operates are located in rural areas near or surrounding the following Texas cities: Dallas, Fort Worth, Corsicana, Baytown, Crosby, Magnolia, Stafford, Victoria, Cuero, and San Antonio.

Services

The company's primary service offerings are broadband and dial-up Internet access, as well as related value-added services. For its business subscribers, the company offers high speed Internet access, Web hosting, co-location, and other business related services.

Wireless Broadband Internet Access: The company's wireless Internet access package includes basic Internet access and related Internet applications, such as World Wide Web browsing, e-mail, file transfer protocol (FTP), and USENET news access. Available value-added services include multiple e-mail mailboxes, national dial-up roaming services, personalized e-mail addresses, and personal Web sites.

High Speed Connectivity DSL Services: The company's DSL products provide high-speed Internet access over existing telephone lines, and may allow subscribers to simultaneously use a single telephone line for voice service and for access to the Internet. DSL provides an 'always on' connection thereby removing wait times associated with dialing into a network.

Commercial Services: The company offers a line of commercial-grade 24x7x365 monitored business services. Broadband connectivity offerings include Metro Ethernet from 3Mbps to 100Mbps, full and fractional T3/DS-3 and T1/DS-1 leased lines, commercial fixed wireless (licensed and unlicensed), and commercial DSL. The company also provides Tier-1 and Tier-2 Colocation services in Stafford, Victoria, and China Grove, Texas as single-server, half-cabinet, and full-cabinet plans.

Dial-Up Internet Access: The company's dial-up Internet access package includes basic Internet access and related Internet applications, such as World Wide Web browsing, e-mail, FTP, and USENET news access. Available value-added services include multiple e-mail mailboxes, national roaming services, personalized e-mail addresses, personal Web sites, and enhanced USENET news access.

Competition

The company competes with national online service providers, such as Time Warner and MSN; national telecommunications providers, such as AT&T Mobility, Qwest Communications, Verizon Wireless, and Sprint Nextel; computer hardware and software companies, and other technology companies, such as Microsoft and Dell; and cable operators, such as Suddenlink Communications, Cox Communications, and Comcast.

History

Internet America Inc. was founded in 1994.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
