The Internet Cable Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Internet Cable Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Internet Cable Corp. business.

About Internet Cable Corp.

Internet Cable Corporation (ICC or the Company), incorporated in Nevada in 1995, provides infrastructure engineering services to the North American broadband markets. Services provided by broadband operators include high-speed Internet access, broadband-phone (telephony), digital video, digital audio, video on demand (VOD), narrowcasting and web-enabled services of all types. Internet Cable Corporation provides major broadband cable operators with services to upgrade, maintain, and expand their network infrastructure to facilitate the delivery of new broadband services.

Internet Cable Corporation's professional services, include system engineering, plant reconstruction, network auditing, troubleshooting, sweep, hardening (correcting trouble spots), ongoing network performance monitoring and maintenance (maintaining the network at standards required by contracted service levels). Services are delivered through Internet Cable Corporation's professional services division, Cable Systems Technical Services Inc.

As an extension of Internet Cable's services, the Company offers in-house training and mentoring programs for broadband operator's technicians. These services are designed to facilitate skill development in various areas of service deployment and network maintenance. Rapidly changing technology dictates a need for ongoing training. Internet

Cable Corporation delivers these services directly to the broadband operators, as well as through its training partnership with the Society of Cable Telecommunications Engineers (SCTE) - the recognized technical association of the cable broadband industry.

The Company provides a comprehensive solution to cable operators' infrastructure needs ranging from basic installation and construction to sophisticated engineering, design and integration. The Company also provides field-proven certification and preventative maintenance methodologies needed to upgrade and maintain the broadband network infrastructure.

Customers

The Company's customers include large cable operators in the North American marketplace who have concentrations of regional subscribers and expertise at providing cable broadband services (digital cable, high speed Internet access, cable telephony). These customers include WideOpenWest or WOW, an MSO operating in the Columbus, Cleveland, Detroit and Chicago markets, AT&T Broadband, Rogers Cablesystems, Cogeco Cable and AOL/Time Warner.

Competition

In the maintenance outsourcing market, the Company will be confronted with competitors that could include companies such as MasTec, Via Source Communications, Dycom and Expertech.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
