## **About Intesa Sanpaolo SpA**

Intesa Sanpaolo S.p.A. provides banking and financial services worldwide. It focuses on the commercial banking activities, as well as retail, corporate, and wealth management activities in Italy.

The company, through a network of 6,354 branches, offers services to approximately 11.2 million customers.

### **Business Units**

The company operates in six business units: Banca dei Territori, Corporate & Investment Banking, Public Finance, International Subsidiary Banks, Eurizon Capital, and Banca Fideuram.

The Banca dei Territori Division is in charge of the traditional lending and deposit collecting activities in Italy and of the related financial services. It serves retail (households, personal, small businesses) and private customers, in addition to small and medium-sized enterprises. This Division includes EurizonVita, the insurance company which provides insurance services for pension plans and coverage for persons and assets.

The Corporate & Investment Banking Division serves corporate customers and financial institutions in Italy and abroad. It offers corporate banking products and services for their customers and investment banking, capital markets, merchant banking, leasing and factoring for the entire Group. The Division is also responsible for proprietary portfolio management.

Public Finance is responsible for customers in government, public entities, local authorities, public utilities, healthcare structures and general contractors and for developing activities related to medium-/long-term lending, project financing, securitizations, financial advisory and purchase of equity stakes in initiatives and investment projects in the reference segments.

The International Subsidiary Banks Division engages in supervising and coordinating activities in markets abroad, where Intesa Sanpaolo is present through subsidiary and partly-owned commercial banks performing retail activities, defining strategies aimed at identifying growth opportunities and managing relations with the centralized structures of the Parent Company and with international branches and representative offices belonging to the Corporate & Investment Banking Division.

Eurizon Capital is the company specialized in providing collective and individual asset management products to the company's internal banking networks also focused on strengthening its presence in the open market segment through specific distribution agreements with other networks and institutional investors.

Banca Fideuram, through its network of private bankers, performs asset gathering activities serving customers with medium to high savings potential.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
