The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Invesco Ltd. business.

### **About Invesco Ltd.**

Invesco Ltd. operates as an investment management organization. As a global investment manager the company engages in the asset management business with offices in 19 countries. The company provides retail, institutional and high-net-worth clients with an array of investment products and services through various brands across the globe. The company's investment products are sold under the brand names AIM, AIM Trimark, Atlantic Trust, INVESCO, Invesco Perpetual, PowerShares and WL Ross & Co. The company's assets under management are invested primarily in equities, with the balance invested in fixed income and other securities.

The company has presence in the institutional and retail segments of the investment management industry in North America, Europe and Asia-Pacific, with clients in approximately 100 countries.

AIM Investments provides products and services through multiple management styles and a range of investments, including mutual funds, exchange-traded funds, and cash management products.

AIM Trimark is a provider of enduring solutions for Canadian investors and their advisors.

Atlantic Trust provides integrated wealth management and investment counseling services for high net worth individuals, families and foundations. Atlantic Trust's professionals deliver a range of offerings, including proprietary investment solutions, open architecture through traditional and alternative managers, as well as estate, trust and related advisory services.

INVESCO has earned the trust of investors around the world. With investment capabilities that span traditional and alternative asset classes, INVESCO provides investment management for institutions and individuals.

As an investment manager in the U.K., Invesco Perpetual manages assets on behalf of consumers, intermediaries and professional investors through a product range.

PowerShares offers approximately 70 investment opportunities through style, industry, commodities, currencies, specialty access and exchange-traded funds (ETFs). PowerShares provides investment advisers with asset management tools and market exposure through the replication of enhanced indexes.

WL Ross & Co. manages alternative assets for institutional investors in the U.S., Europe and Asia. The company has sponsored alternative investments, including private equity funds, co-investment vehicles and hedge funds in the steel, textile, coal, automotive and financial services industries in the U.S., U.K., France, Germany, China, Japan, Korea, Vietnam, India, Brazil and Bermuda.

## Distribution Channels

### Retail

The company provides retail investment solutions to clients through its distribution channels: AIM in the U.S., AIM Trimark in Canada, Invesco Perpetual in the U.K., INVESCO in Europe and Asia, and PowerShares (for its ETF products). The company offers retail products within all of the major asset classes (equity, fixed income, balanced, money market and alternatives) in the form of mutual funds, separately managed accounts, variable annuities, collective trusts and ETFs. The company's retail products are primarily distributed through third-party financial intermediaries, including traditional broker-dealers, fund 'supermarkets,' retirement platforms, financial advisors, insurance companies and trust companies.

The company's North American retail distribution channel offers mutual funds invested

in the U.S., Canada and international markets, including funds that target particular market sectors. The company offers equity, balanced, fixed income, real estate and money market funds.

Through its AIM and AIM Trimark brands, the company also provides investment management services to mutual funds managed by companies unaffiliated with the company. In addition to its sales of fund products through financial intermediaries, third-party pension plans and insurance companies use its funds as investment options under their own separate accounts. Similarly, the company sub-advises funds sponsored by third parties, typically for use as investment options under insurance company separate accounts. AIM has also developed a managed account business, which tailors individual, private

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
