Abstracts

Investment Technology Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Investment Technology Group Inc. and its competitors. This provides our Clients with a clear understanding of Investment Technology Group Inc. position in the Industry.

The report contains detailed information about Investment Technology Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Investment Technology Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Investment Technology Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Investment Technology Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Investment Technology Group Inc. business.

About Investment Technology Group Inc.

Investment Technology Group, Inc. (ITG) operates as an independent agency brokerage and financial technology company. The company partners with asset managers to deliver institutional global liquidity and help improve performance throughout the investment process.

The company's principal subsidiaries include ITG Inc., AlterNet Securities, Inc. (AlterNet), and ITG Derivatives LLC (ITG Derivatives), the United States (U.S.) broker-dealers; Investment Technology Group Limited (ITGL), an institutional broker-dealer in Europe; ITG Australia Limited (ITG Australia), an institutional broker-dealer in Australia; ITG Canada Corp. (ITG Canada), an institutional broker-dealer in Canada; ITG Hong Kong Limited (ITG Hong Kong), an institutional broker-dealer in Hong Kong; ITG Japan Ltd. (ITG Japan), an institutional broker-dealer in Japan; ITG Software Solutions, Inc., its intangible property, software development and maintenance subsidiary in the U.S.; and ITG Solutions Network, Inc. (ITG Solutions Network), a holding company for ITG Analytics, Inc. (ITG Analytics), a provider of pre- and post- trade analysis, fair value and trade optimization services; and The Macgregor Group, Inc. (Macgregor), a provider of trade order management technology and network connectivity services for the financial community.

Segments

The company's reportable operating segments are: the U.S. Operations, Canadian Operations, European Operations, and the Asia Pacific Operations,

The U.S. Operations segment provides trade execution, trade order management, network connectivity and research services to institutional investors, brokers, alternative investment funds, and money managers.

The Canadian Operations segment provides trade execution, network connectivity and research services.

The European Operations segment includes trade execution, trade order management, network connectivity, and research service businesses in Europe, as well as a technology research and development facility in Israel.

The Asia Pacific Operations segment includes trade execution, network connectivity and research service businesses in Australia, Hong Kong, and Japan.

Products and Services

ITG offers a range of solutions for asset managers which span the investment continuum. These offerings include portfolio management, pre-trade analytics, trading solutions and post-trade solutions and are summarized below. Each product is offered in the U.S. and certain other jurisdictions.

PORTFOLIO MANAGEMENT

ITG provides tools to assist asset managers with portfolio decision-making tasks—from portfolio construction and optimization to the enterprise challenges of global, real-time portfolio compliance monitoring and the fair valuation of assets.

ITG Opt is an equity portfolio optimizer that allows portfolio managers to develop new portfolio construction strategies and solve complex optimization problems. ITG Opt allows users to model tax liability, transaction costs, and long/short objectives, while adhering to portfolio-specific constraints.

ITG Compliance is a monitoring, control, and reporting solution that provides the ability to centrally manage global portfolio compliance activity. Pre-trade monitoring helps

asset managers avoid potential violations, while end-of-day capabilities automate the process of determining daily compliance status across a range of investments, funds, and mandates.

ITG Fair Value is an independent service that helps mutual fund managers meet their obligations to investors and regulators to fairly price their funds, and reduce the occurrence and costs of market timing.

PRE-TRADE ANALYTICS

ITG's pre-trade analytics enable portfolio managers and traders to improve execution performance before the trade happens (pre-trade) by providing portfolio analytics and risk models that help them perform predictive analyses and manage risk.

ITG Logic is a pre-trade analysis tool that provides traders and portfolio managers with the means to measure expected transaction and opportunity costs. Trading costs are affected by multiple factors, such as execution strategies, time horizon, volatility, spread, volume, and order size. ITG

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
