The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of INX Inc. business.

About INX Inc.

INX Inc. provides technology infrastructure solutions for enterprise-class organizations, such as corporations, schools and federal, state and local governmental agencies.

Solutions

The company's solutions consist of three categories of technology infrastructure: network infrastructure, unified communications and data center. Its network infrastructure solutions consist of network routing and switching, wireless networking and network security. Its unified communications solutions consist of IP-based voice communications systems (IP PBX systems), Internet Protocol (IP)-based video communications systems and application integration solutions for converged, collaborative communications. The company's data center solutions consist of server virtualization, network storage and data center network connectivity solutions. It offers a range of products and services for Cisco-centric IP network and IP telephony solutions.

The company's network infrastructure and IP voice and video communications solutions are based primarily on Cisco Systems, Inc. (Cisco) technology. Its network storage solutions are primarily based on NetApp, Inc. (NetApp) and EMC Inc. (EMC) technology. The company's virtualization solutions are based primarily on VMware, Inc. (VMware) technology. Its solutions also include products from other manufacturers or

software vendors.

Products

The company's product sales consist primarily of sales of Cisco brand products. NetApp storage products and VMware virtualization software licenses are also material categories of product sales. The company also offers, certain unified communications products from Microsoft, and various products that are 'best-of-breed' in certain areas of the solutions that it provides, including products from Left Hand Networks, Cisterna Networks, Converged Access, IPCelerate, Tandberg, and others.

Services

The company provides two basic categories of service, implementation services and post-sale support services.

Professional Services: The company performs professional services related to the planning, design, implementation and support of the solutions that it provides.

Managed Services: The company provides managed services, including remote monitoring and management of enterprise organizations' network infrastructure, data center, wireless network and security technology, as well as remote disaster recovery hosting. Its managed services include remote monitoring, diagnostics and management of the customer's IP telephony and network infrastructure equipment and related applications.

Customers

The company's customers include private enterprises in numerous industries including healthcare, legal, energy, utilities, hospitality, transportation, manufacturing, finance and entertainment, as well as federal, state and local governmental agencies and private and public educational organizations.

Competition

The company's competitors include IBM Global Services; AT&T; Verizon; Avaya Inc.; and Nortel Networks Corporation.

History

The company was founded in 1983. It was formerly know as I-Sector Corporation and changed its name to INX Inc. in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
