Such information creates your awareness about principal trends of Isramco Inc. business.

About Isramco Inc.

Isramco, Inc. engages in the exploration, development, and production of natural gas and crude oil in the United States.

As of December 31, 2009, the company's estimated total proved oil, natural gas reserves and natural gas liquids included approximately 8,565 thousand barrels of oil equivalent (MBOE), consisting of 3,002 thousand barrels (Bbls) of oil, and 24,452 million cubic feet (Mcf) of natural gas and 1,488 thousand barrels (Bbls) natural gas liquids.

Exploration, Development and Production

United States

The company, through its wholly owned subsidiaries, is involved in oil and gas exploration, developing, production and operation of wells in the United States. It owns varying working interests in oil and gas wells in Louisiana, Texas, New Mexico, Oklahoma, Wyoming, Utah, and Colorado and serves as operator of approximately 620 wells located mainly in Texas and New Mexico.

The company purchased from GFB Acquisition - I, L.P. (GFB) and Trans Republic

Resources, Ltd. (Trans Republic) interests in certain oil and gas properties located in Texas, New Mexico, Utah, Colorado, and Oklahoma. The transaction included mainly operated oil and gas properties in approximately 40 fields (approximately 490 Leases) in East Texas, Texas Gulf Coast, Permian, Anadarko, and San Juan Basins. Significant fields are the Alabama Ferry Field in East Texas, the Bagley Field in West Texas and New Mexico, and the Esperson Dome Field on the Texas Gulf Coast.

Israel

Matan and Michal Licenses: In 2009, Noble Energy, Inc. (Noble) completed the Tamar # 1 (Tamar) well at a depth of 16,076 feet and in approximately 5,500 feet of water. This well is located offshore Israel and is operated by Noble.

In 2009, Noble announced the results from its Tamar #2 appraisal well. This well was, drilled to a total depth of 16,880 feet in 5,530 feet of water and is located approximately 3.5 miles northeast of the original discovery, Tamar #1. The company owns an overriding royalty interest of 1.5375% in the Tamar and Dalit gas fields.

Med Yavne Lease: It covers 53 square kilometers (approximately 13,100 acres) offshore Israel. The recoverable gas reserves of Or 1 reserve are estimated at 35 billion cubic feet. The company's participation interest of the Med Yavne Lease is 0.7052 %.

Markets and Major Customers

Through its wholly-owned subsidiary Jay Management Company, LLC (Jay Management), the company operates a portion of its oil and natural gas properties. Isramco's joint interest partners consist primarily of independent oil and natural gas producers. The purchasers of the company's oil and natural gas production consist primarily of independent marketers, major oil and natural gas companies and gas pipeline companies.

History

Isramco, Inc. was founded in 1982.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
