Such information creates your awareness about principal trends of ITAL TBS SpA business.

About ITAL TBS SpA

ITAL TBS - Telematic & Biomedical Services S.p.A. provides clinical engineering and e-Health services to the public and private health sector in Italy and the European Union. Its Clinical Engineering division engages in the management of the technical inventory; user acceptance testing; preventive and corrective maintenance of biomedical devices and endoscopic instruments of public or private hospitals; safety checks and functional quality control; and management of assistance centers and medical devices for the disabled, as well as offers consultancy and training services. This division operates 200 workshops for managing biomedical equipment; 7 workshops for maintaining endoscopy equipment; and 1 workshop for maintaining surgical equipment. The company's e-Health division provides medical information technology (IT) services and products comprising clinical IT systems that display diagnostic and treatment processes in social and healthcare facilities and offer decision support to healthcare personnel; Electronic Patient Records for creating and maintaining healthcare files for patients; IT systems for social and healthcare services; and outsourced management services for ICT infrastructures. It also offers Telecare services, including teleaid service for the notification of emergencies occurring at patients' homes; and remote control service. In addition, this division provides systems and solutions for remote diagnostics and monitoring of the physiological parameters of patients in various environments, such as chemist's, day care facilities, assisted living facilities, and homes; and social and

healthcare services comprising teleconsultation services with specialized physicians, remote booking of diagnostic services, managing help desk for social and healthcare services, agendas for general practitioners, relations with on-call doctors, and homecare assistance services. The company was founded in 1987 and is headquartered in Basovizza, Italy.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
