The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ITC Holdings Corp. business.

About ITC Holdings Corp.

ITC Holdings Corp., through its subsidiaries, engages in the transmission of electricity in the United States. The operations performed by the company's regulated operating subsidiaries fall into various categories, including asset planning; engineering, design and construction; maintenance; and real time operations.

Through its subsidiary, ITC Transmission, the company owns the assets of a transmission system and related assets, including approximately 2,800 circuit miles of overhead and underground transmission lines rated at voltages of 120 kV to 345 kV; approximately 18,200 transmission towers and poles; station assets, such as transformers and circuit breakers, at 169 stations and substations which either interconnect its transmission facilities or connect ITC Transmission's facilities with generation or distribution facilities owned by others; other transmission equipment necessary to safely operate the system (monitoring and metering equipment); warehouses and related equipment; associated land held in fee, rights of way and easements; an approximately 188,000 square-foot corporate headquarters facility and operations control room, including furniture, fixtures and office equipment; and an approximately 40,000 square-foot facility in Ann Arbor, Michigan that includes a back-up operations control room.

Through its indirect subsidiary, Michigan Electric Transmission Company, LLC (METC), the company owns the assets of a transmission system and related assets, including approximately 5,500 circuit miles of overhead transmission lines rated at voltages of 138 kV to 345 kV; approximately 36,200 transmission towers and poles; station assets, such as transformers and circuit breakers, at 87 stations and substations which either interconnect its transmission facilities or connect METC's facilities with generation or distribution facilities owned by others; other transmission equipment necessary to safely operate the system (monitoring and metering equipment); and warehouses and related equipment.

Through its subsidiary, ITC Midwest LLC, the company owns the assets of a transmission system and related assets, including approximately 6,800 miles of transmission lines rated at voltages of 34.5 kV to 345 kV; transmission towers and poles; station assets, such as transformers and circuit breakers, at approximately 253 stations and substations which either interconnect ITC Midwest's transmission facilities or connect ITC Midwest's facilities with generation or distribution facilities owned by others; other transmission equipment necessary to safely operate the system (monitoring and metering equipment); warehouses and related equipment; and associated land held in fee, rights of way and easements.

Customers

The company's major transmission service customers include The Detroit Edison Company, Consumers Energy and Interstate Power and Light Company. Its customers also include other entities, such as alternative electricity suppliers, power marketers and other wholesale customers that provide electricity to end-use consumers and from transaction-based capacity reservations.

History

ITC Holdings Corp. was founded in 2001.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
