About ITE Holdings Ltd.

ITE Holdings Limited (the Group and/ or ITE) established in early 1997, has been one of the listed companies on the Growth Enterprise Market (GEM) of the Stock Exchange of Hong Kong since 21 February 2001. ITE is a major growing smartcard and radio frequency identification (RFID) service provider and system integrator in Hong Kong.

The Company enhances daily life automation through the implementation of smartcard and RFID technologies. Through providing wide range of innovative applications for life and control automation and implementing its solutions, ITE can improve the standards of everyday life.

The Company develops solutions for clients from many industries in many that include the People's Republic of China (the PRC) and other countries in the Asia Pacific region.

Products

Standard Products

Evaluation Kits

ITE develops several evaluation kits based on ISO15693 Radio Frequency Identification (RFID) technologies, allowing customers to have a quick introduction to this high-end technology. With the evaluation kits, users are able to build up their own program. Several evaluation kits with different reading distances are provided to meet customers' specific needs and requirements. Possible solutions include: Car Park management, E-ticketing, Automotive anti-theft systems, Access Control, Product and asset tracking, Animal identification, Supply chain automation, Asset Management and Waste management

PDA

ITE works with major PDA manufacturer in the PRC, Hi-Tech Wealth. Together the company develops several smartcard and RFID readers for the professional PDA product line. The compact size reader devices have powerful features and a wide range of applications suitable for professional markets and industrial use.

Minec Handheld Terminal

ITE partners with the famous Swedish handheld data collection terminals manufacturer, Minec AB, to be the distributor of its Minec handheld terminals. Minec hand-held terminal is configured to suit particular data collection and communication requirements. The integrated read / write module is chosen from a wide range of alternatives.

Octopus Access Control System

ITE is one of the six sub-contractors of Octopus Access Control System. Developed for residential and commercial use, the Smart Access Control System provided by ITE can greatly enhance the security of user's property. The fast and easy operation of the system has firmly established it as one of the most popular access control systems in Hong Kong.

Including the access control function, the Octopus Access Control System can also be configured to perform numerous features including time attendance, good list/ black list, group settings, time zone settings, log checking and printing.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
