The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ITEX Corp. business.

About ITEX Corp.

ITEX Corporation, through its independent licensed broker and franchise network, operates an exchange for cashless business transactions (the Marketplace) in the United States and Canada.

The company's business services and payment systems enable member businesses (members) to trade goods and services without exchanging cash. These products and services are instead exchanged for ITEX dollars which can only be redeemed in the Marketplace (ITEX dollars). It administers the Marketplace and acts as a third-party record-keeper for its members' transactions.

Marketplace Transactions

The Marketplace provides a forum for members to purchase from and sell their products and services to other members using the currency 'ITEX dollars' instead of the U.S. dollars (USD). An ITEX dollar is an accounting unit used to record the value of transactions as determined by the members in the Marketplace. The company issues, on a case by case basis, ITEX dollar credit lines to certain members. Members with positive ITEX dollar account balances or those within their ITEX dollar credit line may use available ITEX dollars to purchase products or services from other members and may sell their products or services to other members. Those members with negative

ITEX dollar account balances are obligated to sell their products or services to other Marketplace members to offset their negative account balance. It assists members in marketing their products and services through its broker network, newsletters, and e-mail on its Website at www.itex.com and through other promotional means. The Marketplace is useful to businesses, such as hospitality, media, medical care, and other service related businesses. The Marketplace has approximately 24,000 members in the United States and Canada.

Broker Network

The company's brokers provide Marketplace members with information about products and services that are available locally, nationally, and in Canada. Brokers are responsible for enrolling new Marketplace members, training them in Marketplace policies and procedures, facilitating their transactions and assuring payment in USD.

Competition

The company's competitors include eBay, Travelocity, Priceline, and Overstock.com.

History

ITEX Corporation was founded in 1901.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
