Abstracts

ITT Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ITT Corporation and its competitors. This provides our Clients with a clear understanding of ITT Corporation position in the Industry.

The report contains detailed information about ITT Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ITT Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ITT Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ITT Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ITT Corporation business.

About ITT Corporation

ITT Corporation engages in the design, manufacture, and sale of various engineered products and related services in the United States and internationally.

Business Segments

The company's business comprises three principal business segments which are aligned with the markets they serve: Defense Electronics & Services (Defense segment); Fluid Technology (Fluid segment); and Motion & Flow Control (Motion & Flow segment).

Defense Electronics & Services

The Defense segment engages in the development, manufacture, and support of high-technology electronic systems and components for worldwide defense and commercial markets, and by providing communications systems and engineering and applied research. The Defense segment provides products and services that support the United States military and its allies. It also develops space-based technologies that enable global positioning satellite (GPS) systems to communicate a precise location and allow weather satellites to help forecasters calculate when and where the next hurricane

would hit.

The Defense segment sells its products to various governmental and non-governmental entities located worldwide. A substantial portion of U.S. Government work is performed in the United States under prime contracts and subcontracts. Certain products have particular commercial application, including night vision devices.

The Defense segment comprises seven divisions; Advanced Engineering & Sciences, Communication Systems, Electronic Systems, Intelligence & Information Warfare, Night Vision, Space Systems, and Systems Divisions.

Advanced Engineering & Sciences Division (AES): AES provides a range of research, technologies and engineering support services to government, industrial, and commercial customers. In addition, the division provides products and services for information collection, information processing and control, information security, homeland defense, and telecommunications systems. The division also leads the air traffic control modernization program for the U.S. Federal Aviation Administration (FAA).

Communications Systems Division (CS): CS develops wireless networking systems for tactical military and government systems. CS provides military VHF radios, including the Single Channel Ground and Airborne Radio System (SINCGARS) and Advanced Tactical Communications Systems. CS is developing new technologies, such as Soldier Radio Waveform, the U.S. next-generation capability to support network-centric operations, and already provides similar capabilities through its SpearNet systems for the individual soldier. The programmable radio systems, including the SINCGARS SideHat, Soldier Radios and Sensor Radios, are supporting transformational experimentation by the U.S. Army. In addition, CS provides radio systems to the FAA for air traffic control, including the newest ground-to-air radios, border control security systems, and reference – class GPS receivers.

Electronic Systems Division (ES): ES produces a range of next generation information, situational awareness and Electronic Warfare systems for mission success and survivability for multiple military aircraft, surface ships, submarines, and ground vehicles. ES products and technologies include integrated electronic warfare systems for self-protection, reconnaissance and surveillance, counter improvised explosive devices (CIEDs) for vehicles, mine defense, naval command/sonar applications, and submarine communication and tracking. In addition, ES produces aircraft armament suspension/release equipment for front line fighters, electronic weapons interface systems, and advanced composite structures for the U.S. Marine Corp, as well as

mobile, ship and land-based precision landing and air traffic systems for landing assistance in extreme physical environments.

Intelligence & Information Warfare Division (IIW): IIW designs, develops, manufactures, tests, and deploys hardware and software for the U.S. Government, law enforcement agencies, and commercial use. IIW products are utilized in various applications, including protecting soldiers in the field, detecting illegal activity in prisons and secured facilities, an

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
