Abstracts

Jabil Circuit Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Jabil Circuit Inc. and its competitors. This provides our Clients with a clear understanding of Jabil Circuit Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Jabil Circuit Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Jabil Circuit Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Jabil Circuit Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Jabil Circuit Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Jabil Circuit Inc. business.

About Jabil Circuit Inc.

Jabil Circuit, Inc. provides electronic manufacturing services and solutions worldwide. The company provides electronics design, production, product management, and aftermarket services to companies in the aerospace, automotive, computing, consumer, defense, industrial, instrumentation, medical, networking, peripherals, solar, storage, and telecommunications industries.

The company offers its customers electronics design, production, product management, and aftermarket solutions that are responsive to their manufacturing needs. Its business units are capable of providing its customers with varying combinations of the following services: integrated design and engineering; component selection, sourcing and procurement; automated assembly; design and implementation of product testing; parallel global production; enclosure services; systems assembly, direct order fulfillment and configure to order; and aftermarket services.

The company conducts its operations in facilities that are located in Austria, Belgium, Brazil, China, England, France, Germany, Hungary, India, Ireland, Italy, Japan, Malaysia, Mexico, the Netherlands, Poland, Russia, Scotland, Singapore, Taiwan, Ukraine, the U.S., and Vietnam.

Divisions

The company manages its business and operations in three divisions: Consumer, Electronic Manufacturing Services (EMS), and Aftermarket Services (AMS).

The Consumer Division focuses on cell phones and mobile products, televisions, set-top boxes, and peripheral products, such as printers.

The EMS Division focuses on business sectors, such as aerospace, automotive, computing, defense, industrial instrumentation, medical, networking, solar, storage, and telecommunications businesses.

The AMS Division provides warranty and repair services to customers in a range of industries, including certain of its manufacturing customers.

Services

Design Services

The company offers a spectrum of value-add design services for products that it manufactures for its customers. It offers the following design services:

Electronic Design: The company's electronic design team provides electronic circuit design services, including application-specific integrated circuit design and firmware development. These services have been used to develop various circuit designs for cellular telephone accessories, notebook and personal computers, servers, radio frequency products, video set-top boxes, optical communications products, personal digital assistants, communication broadband products, and automotive and consumer appliance controls.

Industrial Design Services: The company's industrial design team assists in designing the 'look and feel' of the plastic and metal enclosures that house printed circuit board assemblies (PCBA) and systems.

Mechanical Design: The company's mechanical engineering design team involves in three-dimensional design and analysis of electronic and optical assemblies using modeling and analytical tools. It also involves in industrial design, advance mechanism development, and tooling management.

Computer-Assisted Design: The company's computer-assisted design (CAD) team provides PCBA design services using advanced CAD/computer-assisted engineering tools, PCBA design testing and verification services, and other consulting services, which include the generation of a bill of materials, approved vendor list, and assembly equipment configuration for a particular PCBA design.

Product Validation: The company's product validation team provides product and process validation. This includes system test, product safety, regulatory compliance, and reliability.

Product Solutions: The company's product solutions efforts are focused on providing system-based solutions to engineering problems and challenges on the design of new technologies and concepts in specific growth areas as a means of expanding its customer relationships.

The company's design centers are located in Vienna, Austria; Hasselt, Belgium; Beijing and Shanghai, China; Colorado Springs, Colorado; St. Petersburg, Florida; Jena, Germany; Tokyo, Japan; Auburn Hills, Michigan; and Hsinchu, Taichung and Taipei, Taiwan.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
