Abstracts

Jaco Electronics Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Jaco Electronics Inc. and its competitors. This provides our Clients with a clear understanding of Jaco Electronics Inc. position in the Industry.

The report contains detailed information about Jaco Electronics Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Jaco Electronics Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Jaco Electronics Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Jaco Electronics Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Jaco Electronics Inc. business.

About Jaco Electronics Inc.

Jaco Electronics, Inc. engages in the distribution of active and passive electronic components used in the manufacture and assembly of electronic products to a variety of industrial Original Equipment Manufacturers. The company also sells products to contract electronics manufacturers, particularly in the Far East, who manufacture products for companies in select segments of the electronics industry.

The company also provides of flat panel display and supporting technology products and services. It distributes a range of semiconductors (active components), including transistors, diodes, memory devices, microprocessors, micro controllers, other integrated circuits, active matrix displays and various board-level products, as well as passive products, consisting primarily of capacitors, resistors and electromechanical devices including power supplies, relays, switches, connectors and printer heads. These products are used in the assembly of a diverse and growing range of electronic products, including: telecommunications equipment, computers and office equipment, medical devices and instrumentation, industrial equipment and controls, military/aerospace systems, voting and gaming machines, automotive electronics, and home entertainment and other consumer electronics.

The company distributes approximately 45,000 products from approximately 100

vendors to a base of 5,500 customers through a direct sales force. It provides various value-added services, including automated inventory management services; integration, turnkey design and development, project management, and extended and post-sale support services for various custom components with flat panel displays; assembly of stock items for customers into pre-packaged kits; and programming and testing of power supplies and crystal oscillators.

Products

The company distributes approximately 45,000 stock items. Its products fall into four categories: semiconductors (Semi), flat panel displays (FPD), passive components (Passive) and electromechanical devices (EMCH).

Semiconductors are active products consisting of such items as integrated circuits, microprocessors, transistors, diodes, dynamic random access memory (RAM), static RAMs, and video RAMs which respond to or activate upon receipt of electronic current. FPDs incorporate such items as flat panels, touch screens and controllers, which are commonly used in personal computers, televisions, automated teller machines, voting and gaming machines, and video monitors, and are rapidly replacing standard cathode ray tubes in various applications, including medical, industrial and commercial equipment, as well as in the specific types of products listed above. Passive components consist primarily of capacitors and resistors. EMCH consists of such products as power supplies, relays and printerheads. Both passive and EMCH products are designed to facilitate completion of electric functions.

Value-Added Services

The company also provides value-added services which are intended to attract new customers, and to maintain and increase sales to existing customers. Value-added services include:

Automated Inventory Management Services: The company offers comprehensive, solutions that manage its customers' inventory reordering, stocking and administration functions.

Kitting: Kitting consists of assembling to a customer's specifications two or 45,000 stock items into pre-packaged kits ready for use in the customer's assembly line. Kitting services allow the company to provide a partial or complete fill of a customer's order and enable the customer to manage its inventory.

Programming: The company offers both field programming instruments, as well as volume production capabilities performed in-house. All standard surface mount and dip packages are available. The company provides custom oscillators at a user-specified frequency. In addition, the company offers configurable modular power supplies featuring the flexibility of 10 wide-range outputs.

FPD Integration: The company's FPD sales specialists and technical engineers work directly with its customers to design, develop, configure, test and deliver solutions to meet specific FPD requirements for both business and consumer applications.

Suppliers

The company has distribution agreements with manufacturers, including AU Optronics, Sharp Electronics Corp; NEC; Kemet Electronics Corporation; Samsung Semiconductor, Inc.; 3M Touch Systems, Inc.; Vishay Intertechnology, Inc.; Vitesse Semiconductor Corporation; Lambda; Cosel; and Epson Electronics America, Inc.

Customers

The company's core customer base consists primarily of small and medium-sized manufacturers that produce electronic equipment used in a variety of industries.

Competition

The company competes with distributors, such as Arrow Electronics, Inc.; Avnet, Inc.; and Nu Horizons Electronic Corporation.

History

Jaco Electronics, Inc. was founded in 1961.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
