Abstracts

Jacobs Engineering Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Jacobs Engineering Group Inc. and its competitors. This provides our Clients with a clear understanding of Jacobs Engineering Group Inc. position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about Jacobs Engineering Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Jacobs Engineering Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Jacobs Engineering Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Jacobs Engineering Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Jacobs Engineering Group Inc. business.

About Jacobs Engineering Group Inc.

Jacobs Engineering Group Inc. provides a range of technical, professional, and construction services to various industrial, commercial, and governmental clients worldwide.

Services

The company provides four categories of services: Project Services; Process, Scientific, and Systems Consulting services; Construction services; and Operations and Maintenance services. Its services range from consulting and conceptual design services to single-responsibility, design-build-operate contracts.

Project Services

The company employs the engineering, design, architectural, and related disciplines necessary to design and engineer modern process plants (including projects for clients in the chemicals and polymers; pharmaceuticals and biotechnology; upstream oil and gas; refining; food and consumer products; and basic resources industries); buildings (including facilities for clients in the health care; education; and criminal justice markets,

as well as other specialized buildings for clients in the private sector); infrastructure projects (including highways, roads, bridges, and other transportation systems; water and wastewater treatment plants; water resources facilities; and other similar plants and facilities); technology and manufacturing facilities (for clients in the aerospace; automotive; defense; semiconductor; and electronics industries); consumer products manufacturing facilities; power plants and stations; pulp and paper plants; and other facilities. The company also employs the requisite scientific, technical, and program management capabilities necessary to provide program integration, testing, and evaluation services for clients in the defense and aerospace industries; for the U.S. Department of Defense (DoD) in support of information systems for weapons acquisition centers; for NASA for aerospace, testing, and propulsion systems and facilities; and for various other agencies of the U.S. federal government in support of environmental programs.

The company provides its clients with various value engineering services, including 'safety in design'. In the area of construction management, it provides its clients with a range of services as an agent for its clients. Also included in the category of project services are certain related services (such as planning, scheduling, procurement, estimating, cost engineering, project accounting, and quality and safety) necessary to support its engineering, design, construction, construction and program management, operations and maintenance, and consulting services.

Process, Scientific, and Systems Consulting

The company offers a range of consulting services, including performing pricing studies, market analyses, and financial projections necessary in determining the feasibility of a project; performing gasoline reformulation modeling; analyzing and evaluating layout and mechanical designs for processing plants; analyzing automation and control systems; analyzing, designing, and executing biocontainment strategies; developing and performing process protocols with respect to the U.S. Food and Drug Administration-mandated qualification and validation requirements; providing consultation on proposed railway and airport expansion projects; and performing geological and metallurgical studies. The company also provides professional and program management services that are required to assist clients (such as the U.S. federal government and its agencies) in a range of defense and aerospace related programs.

Construction

The company provides traditional field construction services to private and public sector clients. In the area of environmental remediation and restoration, it provides environmental remedial construction services for various public and private sector clients. The company also provides its clients with modular construction technology. Its construction technology is an advanced form of engineering and design, off-site fabrication and assembly, and field erection. It provides its clients with an alternative approach to traditional methods of engineering and construction.

Operations and Maintenance (O&M)

The company's operations and maintenance se

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
