Abstracts

James Hardie Industries SE Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between James Hardie Industries SE and its competitors. This provides our Clients with a clear understanding of James Hardie Industries SE position in the [Building Products and Construction Materials](#) Industry.

The report contains detailed information about James Hardie Industries SE that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for James Hardie Industries SE. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The James Hardie Industries SE financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes James Hardie Industries SE competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of James Hardie Industries SE business.

About James Hardie Industries SE

James Hardie Industries N.V. manufactures fiber cement products and systems for internal and external building construction applications in the United States, Australia, New Zealand, and the Philippines. The company markets its fiber cement products and systems under various Hardie brand names and other brand names, such as Artisan Lap and Artisan Accent Trim by James Hardie and Cemplank siding.

The company's fiber cement products are used in various markets, including new residential construction (single and multi-family housing), manufactured housing (mobile and pre-fabricated homes), repair and remodeling and various commercial and industrial applications (stores, warehouses, offices, hotels, motels, schools, libraries, museums, dormitories, hospitals, detention facilities, religious buildings, and gymnasiums). The company manufactures various types of fiber cement products with various patterned profiles and surface finishes for a range of applications, including external siding and soffit lining, internal linings, facades, fencing, pipes and floor and tile underlayments.

Products

The company offers a range of fiber cement products for both exterior and interior applications. In the United States and elsewhere, its products are sold as planks or flat sheets with various patterned profiles and finishes. Outside the United States, it also manufactures fiber cement products for use in other applications, such as building facades, lattice, fencing, decorative columns, flooring, soffit lining and ceiling applications.

The company has developed a proprietary technology platform that enables it to produce thicker yet lighter-weight fiber cement products that are lighter to handle. The first application of this technology has been its Hardietrim plank. Hardietrim plank is a fiber cement trim product that is used on the exterior of residential and commercial construction to replace traditional wood and engineered wood trim. In its interior product range, its ceramic tile underlayment products provide handling and installation characteristics.

During 2009, the company introduced two new siding profiles, Beaded Porch Panel and Shingle Plank. It introduced HardieZone System siding products.

In Australia and New Zealand, new products released include Eclipsa eaves lining, Linea weatherboard and Axon cladding; in Australia, new products include Matrix cladding, Stria cladding, Axent trim, Secura Interior Flooring, Secura Exterior Flooring and EasyLap Panel; in New Zealand products include ShingleSide panel and CLD Cavity Battens, Horizon Lining and Rigid Air Barrier. In the Philippines, products released include Hardisenepa Fascia Board, Hardiplank Siding, Hardifloor Boards and Hardipattern Boards.

Sales, Marketing, and Distribution

The principal markets for its fiber cement products are the United States, Australia, New Zealand, the Philippines, Canada, and in parts of Europe, including the United Kingdom and France. In addition, the company sells fiber cement products in other countries, including Belgium, China, Denmark, Germany, Hong Kong, India, Indonesia, Ireland, Malta, the Middle East (Israel, Kuwait, Qatar and the United Arab Emirates), The Netherlands, Norway, various Pacific Islands, South Africa, South Korea, Spain, Sri Lanka, Switzerland, Taiwan, Turkey, and Vietnam.

History

James Hardie Industries N.V. was founded in 1888.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
