Such information creates your awareness about principal trends of Janus Capital Group Inc. business.

About Janus Capital Group Inc.

Janus Capital Group, Inc. provides investment management, administration, distribution and related services to individual and institutional investors through the Janus series of mutual funds, sub-advised relationships and separate accounts in both domestic and international markets. The company also owns a printing and fulfillment business.

Subsidiaries

As of December 31, 2006, the company's subsidiaries and one equity method investment included:

Janus Capital Management LLC (JCM) (wholly owned subsidiary): JCM offers growth equity, core and international equity funds, and balanced, specialty fixed-income and money market funds.

Enhanced Investment Technologies, LLC (INTECH) (approximate 83% owned subsidiary): INTECH offers risk-managed investment products that are based on a mathematical theorem which attempts to capitalize on the volatility in stock price movements. INTECH manages institutional and private accounts and sub-advises certain Janus mutual funds.

Perkins, Wolf, McDonnell and Company, LLC (PWM) (approximate 30% ownership, accounted for under the equity method): PWM sub-advises certain of Janus' small- and mid-cap value mutual funds.

Capital Group Partners, Inc. (CGP) (wholly owned subsidiary): The operating business of CGP, Rapid Solutions Group (RSG) provides printing and fulfillment services and graphic design capabilities, with a client concentration in the financial services industry.

Segments

The company operates its business in two segments - Investment Management, providing investment management services under investment advisory agreements; and Printing and Fulfillment, comprising the graphics design, commercial printing and fulfillment operations.

Investment Management Segment: The company's investment management segment provides investment management and administrative services to mutual funds, separate accounts and institutional clients in both domestic and international markets. Janus provides investment advisory services through its primary subsidiaries, Janus Capital Management LLC ('JCM' or 'Janus ex-INTECH') and Enhanced Investment Technologies, LLC (INTECH).

Printing and Fulfillment Segment: RSG, the operating business of the printing and fulfillment segment, provides clients with digital and offset printing and fulfillment services. The digital operation focuses on providing clients with communication solutions. The offset printing operations provide customers with full-service graphic and design solutions through prepress services and offset printing, including direct marketing packages, brochures, preprinted base stock and collateral pieces.

History

Janus Capital Group, Inc. was founded in 1998.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
