Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Jewett-Cameron Trading Co. Ltd. business.

About Jewett-Cameron Trading Co. Ltd.

Jewett-Cameron Trading Company Ltd., through its subsidiaries, engages in the warehouse distribution and direct sale of wood products and specialty metal products to home centers and other retailers primarily in the United States.

Segments

The company operates in four segments: Industrial Wood Products; Lawn, Garden, Pet, and Other; Seed Processing and Sales; and Industrial Tools and Clamps.

Industrial Wood Products Segment

The Industrial Wood Products segment includes business conducted by Greenwood Products, Inc. (Greenwood), a wholly owned subsidiary of Jewett-Cameron Lumber Corporation (JCLC). Greenwood is a processor and distributor of industrial wood products. A major product category is treated plywood that is sold to boat manufacturers and the transportation industry.

Lawn, Garden, Pet, and Other Segment

The Lawn, Garden, Pet, and Other segment include business of Jewett-Cameron Lumber Corporation, which is a wholesaler of wood products and a manufacturer and distributor of specialty metal products. Wood products include fencing and landscape timbers, while metal products include dog kennels, proprietary gate support systems, perimeter fencing, and greenhouses. JCLC uses contract manufacturers to make the specialty metal products. The products that JCLC distributes flow through the company's distribution center located in North Plains, Oregon, and are shipped direct to the customer from the manufacturer. Primary customers are home centers and other retailers.

Seed Processing and Sales Segment

The Seed Processing and Sales segment includes the business of Jewett-Cameron Seed Company (JCSC), a wholly owned subsidiary of JCLC. JCSC processes and distributes agricultural seed. It sells seed to distributors.

Industrial Tools and Clamps Segment

The Industrial Tools and Clamps segment includes the business of MSI-PRO (MSI), a wholly owned subsidiary of JCLC. MSI imports and distributes products, such as pneumatic air tools, industrial clamps, and saw blades. These products are primarily sold to retailers that in turn sell to contractors and end users.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
