## Abstracts

JKX Oil & Gas plc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between JKX Oil & Gas plc and its competitors. This provides our Clients with a clear understanding of JKX Oil & Gas plc position in the [Energy](#) Industry.

The report contains detailed information about JKX Oil & Gas plc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for JKX Oil & Gas plc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The JKX Oil & Gas plc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes JKX Oil & Gas plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of JKX Oil & Gas plc business.

## **About JKX Oil & Gas plc**

JKX Oil & Gas plc engages in the exploration, development, and production of oil and gas reserves. The company's principal interests are located in Ukraine, with additional interests in Georgia, Bulgaria, Turkey and USA.

### **Ukraine**

The Poltava Petroleum Company (PPC) is a wholly owned subsidiary of the company, holds 4 production licences covering 271 square kilo meters in the Poltava region of Ukraine. PPC has three exploration permits in the area: Zaplavskoye, Elizavetovskoye and Chervonoyarske East, representing a total licensed exploration area of 171.2 square kilo meters. The Ignatovskoye production licence is located in the centre of the Novo-Nikolaevskoye Complex and contains the field to be developed by PPC.

The Molchanovskoye production licence is located approximately 8 kilo meters from the Ignatovskoye field and contains the southernmost producing field within the complex. Molchanovskoye Main produces gas condensate in the Devonian sandstone and is being evaluated for additional reserves in the overlying Tournasian carbonate and Visean sandstone reservoirs. The Novo-Nikolaevskoye production licence lies 3 kilo meters to the west of the Ignatovskoye field. The Elizavetovskoye exploration licence is

located in the central part of the Dnieper-Donets basin and covers an area of 70 square kilo meters. The Chervonoyarske East exploration licence covers a total area of 5.5 square kilo meters.

## Russia

The company owns Yuzhgazenergie (YGE), which holds the licence to redevelop the 34.7 square kilometer Koshekhabl'skoye gas field, located in the Republic of Adygea in southern Russia.

## Hungary

The company has a 50 percent interest in the northern Pannonian Basin Hernad licences in a joint venture with the operator, Hungarian Horizon Energy (HHE). The Hernád I licence covers 2,903 square kilo meters and the Hernad II licence covers 2,507 square kilo meters. The Pannonian Basin comprises numerous sub-basins developed across Hungary, Slovenia, and Romania.

Hajdunanas Discovery: The company owns 348 square kilo meters of 3D seismic data over the south eastern portion of Hernad I and identified the Hajdunanas prospect.

Nyírseg Licence: In 2008, the company farmed-in for a 33.3% interest in 120 square kilo meters of the adjacent Nyírseg licence operated by PetroHungaria.

## Bulgaria

The company established operations in Bulgaria by farming into two onshore exploration permits, B Golitza and B1 Golitza, in eastern Bulgaria. The area includes various leads, which could each contain 50 Bcf of gas at a depth of approximately 2,000 metres.

## Slovakia

In 2008, JKX farmed-in to three exploration licences in the Carpathian Fold Belt in Slovakia. The licences cover a total area of 2,278 square kilo meters. JKX acquired a 25% interest in the Svidnik, Medzilaborce, and Snina licences from Aurelian Oil & Gas plc.

## Georgia

The company has a 4 percent net profit interest in the Georgian Black Sea Production Sharing Contract (PSC) for an area that covers 8,900 square kilometers – approximately 80 per cent of the Georgian Black sea shelf. The operator, Anadarko Petroleum Corporation, has carried out extensive surveys on the block and has identified various significant prospects.

## Turkey

**Karakilise Licences:** JKX was a participant during 2008 in the three Karakilise onshore exploration licences, covering a total of 1,230 square kilo meters in south-eastern Turkey close to the town of Diyarbakir. In May 2008 an exploration well, Hakan Yilmaz -1, was drilled to test a Cretaceous age Mardin Limestone target in the north of the licence.

**South East Bismil Licences:** In January 2008, the company farmed-in to two onshore exploration licences in the South East Bismil area of south east Turkey.

## USA

JKX held a 34.4% working interest in the 11,290 acres of the West Huxley Deep Federal Unit in Shelby County, east Texas.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
