## Abstracts

John Bean Technologies Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between John Bean Technologies Corporation and its competitors. This provides our Clients with a clear understanding of John Bean Technologies Corporation position in the [Heavy Machinery](#) Industry.

The report contains detailed information about John Bean Technologies Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for John Bean Technologies Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The John Bean Technologies Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes John Bean Technologies Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of John Bean Technologies Corporation business.

## **About John Bean Technologies Corporation**

John Bean Technologies Corporation designs, manufactures, tests, and services systems and products for customers in the food processing and air transportation industries in the United States and internationally.

### Segments

The company operates in two segments, JBT FoodTech and JBT AeroTech.

### JBT FOODTECH

JBT FoodTech is a supplier of customized industrial food processing solutions and services used in the food processing industry. The company designs, manufactures and services food processing systems for the preparation of ready-to-eat meals, shelf stable packaged foods, meat, seafood and poultry products, juice and dairy products, fruit and vegetable and bakery products.

### Solutions, Products and Services

The company offers a portfolio of systems, equipment and services to its customers which are often sold as part of an integrated processing line solution. It categorizes its technology solutions offerings into freezing and chilling, protein processing, in-container processing and fruit processing.

**Freezing and Chilling:** The company is a supplier of freezing and chilling solutions to the food processing industry. It designs, assembles, tests and installs technologies that include individual quick freezing (IQF), self-stacking spiral, linear/impingement and contact freezers and chillers. It offers a range of capacities and accessories to optimize its customers' variable production needs. Its industrial freezers can be found in plants that are processing food products ranging from meat, seafood and poultry to bakery products and ready-to-eat meals, fruits, vegetables and dairy products. The company's products include FloFREEZE Individual Quick Freeze (IQF); GYRoCOMPACT Self-Stacking Spiral Freezer, Chiller, Proofer; and ADVANTEC Linear Freezers and Chillers.

**Protein Processing:** The company is a supplier of equipment and services that enable it to provide integrated protein processing lines for various convenient food products. Its systems offerings include horizontal slicers, continuous water-jet portioners, coating and seasoning applicators, frying systems and oven and cooking systems. Its integrated processing lines often span from the raw products initial point of entry onto the processing line through final packaging. The company also provides systems that portion, coat or cook other food products ranging from breads and pizzas to meat patties, seafood and ready-to-eat meals. Its products include DSI Portioners; Coating Applicators; THERMoFIN Frying Systems; GYRoCOMPACT Spiral Ovens; and JSO JetStream Linear Ovens.

**In-Container Processing:** The company is a global supplier of integrated industrial sterilization systems that manufacture shelf stable foods in various flexible and rigid packages. These integrated solutions include fillers, closers, sterilizers, material handling systems and controls that process foods, including fruits and vegetables, soups and sauces, dairy products, a range of ready-to-eat meals and pet foods. The company offers selection of sterilization products, including continuous rotary and hydrostatic sterilizers primarily used for processing metal cans. It also provides automated batch retorts which can process various packages, such as plastic pouches, cartons, glass and cans. The company's offering also includes specialized material handling systems to automate the handling and tracking of processed and unprocessed containers. In addition, the company offers modeling software, as well as thermal processing controls that help its customers optimize and track their cooking processes

and introduce on-line corrections in the case of any process deviations. The company's in-container processing solutions technology offerings include fillers, closers, continuous rotary and hydrostatic sterilizers, automated batch retorts, and LOG-TEC control systems and modeling software.

**Fruit Processing:** The company is a supplier of industrial citrus processing equipment. Its citrus processing solutions typically include citrus extractors, finishers, pulp systems, evaporators and by-product recovery systems as well as aseptic systems (including sterilizers, fillers, flow lines and controls)

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
