The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Johnson Controls Inc. business.

About Johnson Controls Inc.

Johnson Controls, Inc. operates in building efficiency, automotive experience, and power solutions businesses worldwide.

Products/Systems and Services

Building Efficiency

The company's building efficiency business designs, produces, markets, and installs integrated heating, ventilating, and air conditioning (HVAC) systems, building management systems, controls, security, and mechanical equipment. In addition, the building efficiency business provides technical services, energy management consulting and operations of entire real estate portfolios for the non-residential buildings market. It also provides residential air conditioning and heating systems and industrial refrigeration products.

The company's systems include York chillers, industrial refrigeration products, air handlers, and other HVAC mechanical equipment that provide heating and cooling in non-residential buildings. The Metasys control system monitors and integrates HVAC equipment with other critical buildings systems. It offers a range of solutions, such as

performance contracting under which guaranteed energy savings are used by the customer. In addition, the global workplace solutions segment provides full-time on-site operations staff and real estate and energy consulting services to help customers, especially multi-national companies. Its on-site staff performs tasks related to the comfort and reliability of the facility, and manages subcontractors for functions, such as foodservice, cleaning, maintenance, and landscaping. Through its North America unitary products business, the company produces air conditioning and heating equipment for the residential market.

Automotive experience

The company's automotive experience business is an automotive supplier, providing interior systems through its design and engineering know how. Its technologies include seating and overhead systems, door systems, floor consoles, instrument panels, cockpits, and integrated electronics.

Automotive experience designs and manufactures interior products and systems for passenger cars and light trucks, including vans, pick-up trucks, and sport/crossover utility vehicles in Asia, Europe, North America, and South America. Automotive experience systems and products include complete seating systems and components; cockpit systems, including instrument panels and clusters, information displays and body controllers; overhead systems, including headliners and electronic convenience features; floor consoles; and door systems. The business produces automotive interior systems for original equipment manufacturers (OEMs) and operates approximately 175 wholly- and majority-owned manufacturing or assembly plants in 27 countries worldwide. The business operates assembly plants that supply automotive OEMs with complete seats on a just-in-time/in-sequence basis.

Power solutions

The company's power solutions service both automotive OEMs and the battery aftermarket by providing advanced battery technology, coupled with systems engineering, marketing, and service expertise. Its power solutions is a producer of lead-acid automotive batteries, producing approximately 120 million lead-acid batteries annually in approximately 55 wholly- and majority-owned manufacturing or assembly plants in 18 countries worldwide. It also offers absorbent glass mat (AGM) and lithium-ion battery technologies to power hybrid vehicles.

Power solutions is the supplier of batteries to various merchants in the battery

aftermarket, including Advance Auto Parts, AutoZone, Robert Bosch GmbH, Costco, Interstate Battery System of America, Pep Boys, Sears, Roebuck & Co., and Wal-Mart stores. Automotive batteries are sold under private label and under the company's brand names (Optima, Varta, LTH, and Heliar) to automotive replacement battery retailers and distributors and to automobile manufacturers as original equipment.

Customers

The company's major customers include Ford Motor Company (Ford); General Motors Corporation (GM); Daimler AG; Chrysler LLP (the Detroit 3); and Toyota Motor Corporation.

Competition

Building efficiency: The company's major competitors include Honeywell International, Inc.; Siemens Building Technologies, an operating group of Siemens AG; Carrier Corporation, a subsidiary of United Technologies Corporation; Trane Incorporated, a subsidiary of Ingersoll-Rand Company Limited; Rheem Manufacturing Company; Lennox International, Inc.; and Goodman Global, Inc.

Automotive Experience: The company's major competitors include Lear Corporation, Faurecia SA, and Magna International Inc.

Power Solutions: The company's major competitors include Exide Technologies, GS Yuasa Corporation, East Penn Manufacturing Company, and Fiamm Group.

History

The company was founded in 1885. It was formerly known as Johnson Electric Service Company and changed its name to Johnson Controls, Inc. in 1974.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
