Abstracts

Jubilant Life Sciences Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Jubilant Life Sciences Ltd. and its competitors. This provides our Clients with a clear understanding of Jubilant Life Sciences Ltd. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Jubilant Life Sciences Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Jubilant Life Sciences Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Jubilant Life Sciences Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Jubilant Life Sciences Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Jubilant Life Sciences Ltd. business.

About Jubilant Life Sciences Ltd.

Jubilant Organosys Limited, an integrated pharmaceutical company, provides custom research and manufacturing services (CRAMS), and drug discovery and development services (DDDS) in India.

The company has operations across the pharmaceuticals value chain ranging from drug discovery services, custom research and manufacturing services, advance intermediates and fine chemicals to active pharmaceutical ingredients, dosage forms, and regulatory affairs services.

Segments

The company's primary business segments are organized around customers, on industry and product lines as under:

Pharmaceuticals and Life Sciences Products & Services: This segment includes Active Pharmaceuticals Ingredients (APIs) and Custom Research & Manufacturing Services.

Industrial & Performance Products: This segment includes Organic Intermediates, Agri

and Animal Nutrition Products, Industrial products for tyres, textiles and coatings; Consumer Products for woodworking solutions; and Food Polymers and Specialty Gases.

PHARMACEUTICALS AND LIFE SCIENCES PRODUCTS & SERVICES (PLSPS)

The company's PLSPS business is divided into the following sub-segments: CRAMS - Custom Research & Manufacturing Services, Drug Discovery and Development Services, Generic Dosage Forms, and Healthcare.

CRAMS

The company is a manufacturer of Pyridine and its derivatives worldwide. It provides a range of fine chemicals and advanced intermediates to the global pharmaceuticals, agrochemicals, and life sciences industry. These comprise pyridine and its derivatives - which are used as solvents, basic building blocks, and advanced intermediates with application in the pharmaceuticals and agrochemicals industry. Within Proprietary Products, the company has a library of approximately 150 products which are developed in house.

The company, under its nutritional products business, makes Niacin and Niacinamide. It is integrated into manufacturing of Beta Picoline, which is the basic raw material used in the making of nutritional products.

The company, under Exclusive Synthesis, offers research, development, and manufacturing services for intermediates and APIs for New Chemical Entities (NCEs) and in market products from development to commercialization stage.

Active Pharmaceutical Ingredients (APIs): The company, under APIs, focuses on therapeutic segments, such as Central Nervous System (CNS), Cardiovascular System (CVS), Gastro Intestinal (GI), and Anti-Infectives. It has 19 products under active development. Its APIs are exported worldwide, into emerging as well as developed markets. The main markets are North America, South America, Europe, Japan, Korea, CIS Countries, and Australia.

CMO of Sterile Injectables and Non-Sterile Products: The CMO business services the range of life sciences industry requirements - from large scale pharmaceutical companies to virtual biotechnology organizations, with two independently branded CMO organizations in North America: Hollister-Stier contract manufacturing located in

Spokane, Washington, USA and Draxis Pharma located in Montreal, Canada, and its own in-house solid dosage form capabilities.

The Hollister-Stier facility is focused on the delivery of clinical and commercial fill and finish services for sterile parenteral pharmaceuticals, utilizing both liquid and lyophilisation capabilities.

Speciality Pharmaceuticals: Speciality Pharmaceuticals business comprises Radiopharmaceuticals and Allergenic Extracts. Nuclear medicine imaging and therapeutic agents are the focus of the Radiopharmaceuticals Division 'DRAXIMAGE' which develops, manufactures, and markets diagnostic imaging and therapeutic radiopharmaceutical products for the global marketplace. Products marketed by the radiopharmaceutical division include a line of lyophilized Technetium-99m kits used in nuclear medicine imaging procedures and a line of imaging and therapeutic products labeled with a variety of isotopes including Sodium Iodide I-131.

Drug Discovery and Development Services (DDDS)

The Drug Discovery and Development Services business is integrated across three subsidiaries, Jubilant Biosys, Jubilant Chemsys and Clinsys Clinical Re

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
