term solvency. This sort of company's information will assist and strengthen your company’s decision-making processes.

In the part that describes Juniper Networks, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company’s competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company’s business and sales activities will be boosted by gaining an insight into your competitors’ businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Juniper Networks, Inc. business.

About Juniper Networks, Inc.

Juniper Networks, Inc. engages in the design, development, and sale of products and services that together provide its customers with network infrastructure that creates environments for accelerating the deployment of services and applications over a single network.

Segments

The company’s segments include Infrastructure and Service Layer Technologies (SLT).

The Infrastructure Segment primarily offers routing and switching products that are used to control and direct network traffic from the core, through the edge, aggregation, and the customer premise equipment level. Infrastructure products include its Internet Protocol (IP) routing and carrier Ethernet routing portfolio, as well as its Ethernet switching portfolio.

The SLT segment offers solutions that meet a range of its customer’s priorities, from protecting the network itself, and protecting data on the network, to improving existing bandwidth and acceleration of applications across a distributed network. It offers a family of network security solutions that deliver security for enterprises, service

providers, and government entities, including integrated firewall and VPN solutions, secure sockets layer (SSL) VPN appliances, and IDP appliances. It also offers complementary products and technologies to enable its customers to provide additional IP-based services and enhance the performance and security of their existing networks and applications.

Products

Infrastructure Products

T-Series, TX, JCS, and M-Series: The company's T-series core routers are primarily designed for core IP infrastructures and are also being sold into the multi-service environment. The TX and TX Plus products connect multiple T-series chassis to deliver multi-chassis scale in a single network node for core routing applications.

E-Series: The company's E-series products are a featured platform designed for the network edge with support for carrier-class routing, broadband subscriber management services and a set of IP services. Leveraging its JUNOSe operating system, the E-Series service delivery architecture enables service providers to deploy revenue-generating services to their customers. All E-series platforms offer a suite of routing protocols and provide scalable capacity for various users.

MX-Series: The MX-Series is a product family developed to address emerging Ethernet network architectures and services in service provider and enterprise networks.

EX-Series: The company's EX-series family expands its product portfolio running its JUNOS operating system to address the Ethernet switch market. Its EX-series switches are designed to enable customers to accelerate and simplify the way they install and manage business applications across their networks and improve network operations without comprising performance.

SLT Products

Services Gateway, Integrated Firewall, and VPN Solutions: The company's firewall and VPN systems and appliances are designed to provide integrated firewall, VPN, and denial of service protection capabilities for both enterprise environments and service provider network infrastructures. These products range from its SSG products, which combine LAN/WAN routing capabilities with unified threat management features, such as anti-virus, anti-spam, and Web filtering technologies, to its ISG and NetScreen series

+44 20 8123 2220
info@marketpublishers.com

firewall and VPN systems, which are designed to deliver security in medium/large enterprise and carrier networks and data centers. In addition, the company offers the SRX-series of dynamic services gateways.

SSL VPN Appliances: The company's SSL VPN appliances are used to secure remote access for mobile employees, secure extranets for customers and partners, and secure intranets and are designed to be used in enterprise environments of various sizes.

IDP Appliances: The company's IDP appliances utilize advanced intrusion detection methods to increase the detect and prevent network attacks and also provide traffic processing and alarm collection, presentation, and forwarding. Once an attack is detected, its IDP appliances prevent the intrusion by dropping the packets or connection associated with the attack, reducing or eliminat

The above Company Fundamental Report is a half-ready report and contents are subject to change.
It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

+44 20 8123 2220
info@marketpublishers.com

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

+44 20 8123 2220
info@marketpublishers.com

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources
- Financial
- Physical
- Technological
- Organizational

Intangible resources
- Human
- Innovation and Creativity

+44 20 8123 2220
info@marketpublishers.com

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company’s competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
