The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kazakhmys PLC business.

About Kazakhmys PLC

Kazakhmys PLC operates in the natural resources industry. The company's divisions include Kazakhmys Copper; MKM; Kazakhmys Power; and Kazakhmys Petroleum.

Kazakhmys Copper

The company engages in the production and sale of copper cathodes, rod and copper metal in concentrate; zinc metal and zinc metal in concentrate; gold and silver; and other by-product metals (lead, rhenium, selenium, cadmium, and sulphuric acid).

The company processes the copper ore it produces and utilises most of the copper concentrate it processes. The Kazakhmys Copper segment includes Kazakhmys Sales Ltd, which consists of a trading function responsible for the purchases of exported products from the Kazakhmys Copper operations in Kazakhstan, application of an appropriate mark-up and then onward sale to third parties.

Kazakhmys Copper has 20 mines and 10 concentrators spread across four regional units, including Zhezkazgan, Balkhash, Karaganda and the East Region. Zhezkazgan and Balkhash each have a copper smelter with Balkhash, including a precious metals refinery and zinc refinery. In the Karaganda Region there are two coal mines

which supply the Copper Division's three captive power plants.

MKM

MKM operates in Germany, where it manufactures copper and copper alloy semi-finished products. MKM purchases copper from independent traders, and produces and sells various semi-finished copper and copper alloy products. These consist of wire, flat tubes and bar products for a range of industrial uses. MKM sells a range of semi-finished copper and copper alloy products. Its products are sold to a range of fabricators, for use in construction, infrastructure, automotive, and other industrial uses. Principal markets are in Europe and the Middle East.

Kazakhmys Power

The company owns the Ekibastuz coal-fired power plant and the Maikuben West coal mine. The principal activities of the Kazakhmys Power segment includes the Ekibastuz and Maikuben West businesses, is the sale of electricity to external customers. The company's Ekibastuz GRES-1 coal-fired power plant has potential capacity of 4,000 MW. The company also has three captive plants managed within the Copper Division.

Kazakhmys Gold

The company engages in the mining and processing of gold ore into refined ore and exploration and development activity in the precious metal sector within the Central Asian region. Kazakhmys Gold is a separate division, consisting of two gold mines in eastern Kazakhstan and three gold/silver development projects in Kazakhstan and neighbouring countries.

Kazakhmys Petroleum

The company has a license to conduct oil and gas exploration and development activity in the East Akzhar Exploration Block in western Kazakhstan. It owns Dostan-Temir, which holds the petroleum exploration rights for a 602 km² block in western Kazakhstan.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
