The Kendle International Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Kendle International Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kendle International Inc. business.

About Kendle International Inc.

Kendle International Inc., a clinical research organization, provides phase I-IV global clinical development services to the biopharmaceutical industry. The company offers value-added clinical research services and proprietary information technology. It has operations in North America, Europe, the Asia/Pacific, Latin America, and Africa.

Segments

The company operates in two segments: Early Stage and Late Stage.

Early Stage

The Early Stage segment focuses on the high-end scientific exploratory medicine area, from First-in-Human studies through proof-of-concept stages, in the company's Toronto, Canada, and Utrecht, The Netherlands locations. The company also provides support for Phase I studies in established compounds, including bioequivalence and pharmacokinetics studies, at its Morgantown, West Virginia location.

Late Stage

The Late Stage segment includes four reporting units: Clinical and Data Monitoring, Project Management & Late Phase, Regulatory, Site and Medical Affairs, and Biostatistics.

The Clinical and Data Monitoring unit (C&DM) includes the former Global Clinical Development (GCD) unit and conducts Phase II through IV clinical trials worldwide. C&DM provides a range of services, including clinical monitoring, investigator recruitment, patient recruitment, data management and study reports to assist customers with their drug development efforts.

The Project Management & Late Phase (PM & LP) unit oversees all steps of a study, from award through close out of a study. This unit also designs and conducts Phase IIIB and IV studies worldwide. In addition, the Late Phase unit also focuses on health economics and outcomes research, observational studies, scientific events and medical education services. Also included in PM & LP is a group formed to provide services to the federal government and health care foundation oriented organizations.

The Regulatory, Site and Medical Affairs unit provides regulatory expertise and consulting services at every stage of drug and device development, from early development to market and post market. This unit designs, among other things, clinical programs and clinical trial protocols, reviews programs and provides gap analysis to assist sponsors in achieving their clinical development strategies. The unit also provides consulting services for nonclinical development for small molecules, biologicals, vaccines and devices. This unit has Chemistry, Manufacturing and Controls experts that assist with the U.S. Food and Drug Administration application process. Additionally, this unit has safety experts that assist customers with the collection, analysis, and reporting of drug safety data.

The Biostatistics and Statistical Programming unit offers statistical support for Phase I to IV clinical trials and submissions.

Competition

The company's competitors include Covance, Inc., PAREXEL International Corporation, Pharmaceutical Product Development, Inc., ICON plc, PRA International, PharmaNet Development Group, Inc., and Quintiles Transnational Corporation.

History

Kendle International Inc. was founded in 1981.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
