## Abstracts

Kennametal Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Kennametal Inc. and its competitors. This provides our Clients with a clear understanding of Kennametal Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Kennametal Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Kennametal Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Kennametal Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Kennametal Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kennametal Inc. business.

### **About Kennametal Inc.**

Kennametal Inc. engages in the manufacture and supply of tooling, engineered components, and materials consumed in production processes. The company's end users' products include items ranging from airframes to coal, engines to oil wells, and turbochargers to flow control.

The company's products' end users include manufacturers and suppliers across various industries, including the aerospace, automotive, machine tool, light machinery and heavy machinery industries, as well as manufacturers, producers and suppliers in various other industries, including coal mining, highway construction, quarrying, and oil and gas exploration and production industries. The company markets its products through two basic brand names, Kennametal and Widia.

The company involves in developing and manufacturing metalworking tools and wear-resistant parts and coatings using a specialized type of powder metallurgy. It also manufactures and markets a line of toolholders, toolholding systems, and rotary cutting tools by machining and fabricating steel bars and other metal alloys. It supplies metalworking consumables and related products in the United States (U.S.) and Europe. The company also manufactures products made from tungsten carbide or other hard materials that are used in engineered applications, mining and highway

construction and other similar applications, including compacts and metallurgical powders.

## Segments

The company operates in two segments, Metalworking Solutions & Services Group (MSSG) and Advanced Materials Solutions Group (AMSG).

### Metalworking Solutions & Services Group (MSSG) Segment

In the MSSG segment, the company provides consumable metalcutting tools and tooling systems to manufacturing companies in a range of industries throughout the world. Metalcutting operations include turning, boring, threading, grooving, milling, and drilling. Its tooling systems consist of a steel toolholder and cutting tools, such as indexable inserts and drills made from cemented tungsten carbides, ceramics, cermets or other hard materials. The company also provides solutions to its customers' metalcutting needs through engineering services. Engineering services include field sales engineers identifying products and engineering product designs to serve customer needs.

The company serves various industries that cut and shape metal parts, including manufacturers of automobiles, trucks, aerospace components, farm equipment, oil and gas drilling and processing equipment, railroad, marine and power generation equipment, light and heavy machinery, appliances, factory equipment, and metal components, as well as job shops and maintenance operations.

### Advanced Materials Solutions Group (AMSG) Segment

In the AMSG segment, the company's principal business lines include the production and sale of cemented tungsten carbide products used in mining, highway construction, and engineered applications requiring wear and corrosion resistance, including compacts and other similar applications. Additionally, the company manufactures and markets engineered components with a proprietary metal cladding technology, as well as other hard materials that likewise provide wear resistance and life extension of the target component. These products include radial bearings used for directional drilling for oil and gas; extruder barrels used by plastics manufacturers, turbine blades, burner tips and tubing used in power generation applications, food processors and numerous other engineered components to service various industrial markets. It also provides metallurgical powders to manufacturers of cemented tungsten carbide products,

intermetallic composite ceramic powders and parts used in the metalized film industry. The company also provides application-specific component design services and on-site application support services. It provides its customers with engineered component process technology and materials that focus on component deburring, polishing, and producing controlled radii.

The company's mining and construction tools include products fabricated from steel parts tipped with cemented carbide, as well as wear resistant products made from steels and other hard materials. Mining tools, used primarily in the coal industry, include longwall shearer and continuous miner drums, blocks, conical bits, drills, pinning rods, augers, cladded products, wear pins, and a range of mining tool accessories. Highway construction cutting tools include carbide-tipped bits for ditching, trenching and road planning, grader blades for site preparation and routine roadbed control and snowplow blades and shoes for winter road plowing. The company produces these products for mine operators and suppliers, highway construction companies, municipal governments and manufacturers of mining equipment.

The company's customers use engineered products in manufacturing or other operations where extremes of abrasion, corrosion or impact require combinations of hardness or other toughness afforded by cemented tungsten carbides, ceramics or other hard materials.

### International Operations

The company's primary international operations are conducted in western Europe, the Asia Pacific, India, Latin America, and Canada. In addition, it has manufacturing and distribution operations in Israel and South Africa, as well as sales companies, sales agents, and distributors in eastern Europe and other areas of the world.

### History

Kennametal Inc. was founded in 1938.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
