The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kerry Group plc business.

About Kerry Group plc

Kerry Group plc engages in the development, manufacture, and delivery of ingredients, flavors, and integrated solutions for the food and beverage industry. The company offers culinary, dairy, lipid, meat, cereal, sweet and beverage systems and flavors to food manufacturers and foodservice companies.

Through organic growth and acquisitions in both branded and private label sectors, Kerry Foods produces chilled consumer food products in the U.K. and Ireland. The company's brands are household names, including category brands, such as Walls, Mattessons, Richmond, Cheestrings, Denny, Dawn, Ballyfree, Low-Low and Charleville.

Segments

The company operates in two segments, Ingredients and Flavors, and Consumer Foods.

The Ingredients and Flavors segment

The company's range of products include seasonings, coating systems, sweet ingredients, fruit preparations, cheese and dairy ingredients, functional dairy and

confectionary ingredients for the food processing and food service industries. It operates in the poultry, fish, meat, vegetable and convenience sectors through its range of batters and breaders, predusts and intermediaries, flavoured coatings, traditional breadcrumb, breadcrumb and JCT Japanese breadcrumb systems.

In the area of savoury flavourings and ingredients, the company delivers flavour, aroma, succulence and functionality across the added value food applications, including bouillons and sauces for frozen or chilled ready meal application; marinades and glazes for meat, fish and poultry; dehydrated meat and vegetables for soups, sauces, breakfast items, infant foods and confectionery; textured proteins for meat-free recipes; and functional proteins to improve succulence, binding and yield.

The company supplies snack flavourings to the snack sector in Europe. Through its specialist fruit preparation centres in France, Italy, Poland and the U.K., and its fruit processing systems from fruit sourcing, processing and applications, Kerry operates in the specialist fruit preparations and confectionery markets in Europe. Its 'Kerry PSF', 'Kerry Aptunion' and 'Kerry Ravifruit' business units are focused on the development of applications in fresh/frozen dairy product markets, bakery and confectionery markets and the artisanal - foodservice sectors, respectively.

The company engages in the development and manufacture of sweet flavourings for the premium ice cream, confectionery, ready-to-eat cereal, bakery, dairy and nutraceutical product sectors across Europe. The company supplies flavoured textured particulates, high protein inclusions, coated pieces, hard candy, agglomerates, and speciality chocolate and compound coatings technologies.

Consumer Foods

The Consumer Foods segment manufactures and sells chilled foods in Ireland and the U.K. It offers bacon rashers, chilled juice / smoothies, cooked meats, dairy spreads, cheese and cheese snacks, frozen vegetable snacks, milk and dairy products, mineral water, ready meals, ready to cook, sandwiches, sausage, and savoury pastry products.

Markets

The company sells its products in European markets, American markets, and Asia-Pacific markets.

History

Kerry Group plc was founded in 1972.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
