Abstracts

Keynote Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Keynote Systems Inc. and its competitors. This provides our Clients with a clear understanding of Keynote Systems Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Keynote Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Keynote Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Keynote Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Keynote Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Keynote Systems Inc. business.

About Keynote Systems Inc.

Keynote Systems, Inc. develops and sells technology solutions to measure, test, assure, and improve the quality of service for Internet and mobile communications. The company offers Internet test and measurement (Internet) software-as-a-service solutions, mobile test and measurement (Mobile) software-as-a-service, and licensed solutions.

The company's Internet category includes all of its geographically distributed 'on demand' Web site and transaction/application monitoring and measurement services, voice-over-IP (VoIP) and streaming measurement services, load testing services, customer experience management services, competitive research and industry scorecard services, and custom professional services. The Mobile category consists of its on-demand Mobile monitoring and testing services, Global Roamer services, and SIGOS System Integrated Test Environment (SITE) systems.

The company's Internet solutions consist primarily of measurement services that are based on a network of strategically-located measurement and testing computers running its proprietary software that measure online business performance from the viewpoint of a geographically dispersed user base. The company's approximately 3,000 measurement computers and mobile devices are connected to approximately 240 major

Internet backbone and last mile locations around the world via a operations center for collecting, analyzing, and disseminating Web application response time and availability data, along with diagnostic tools to uncover the source of performance problems. As of September 30, 2009, the company measured approximately 18,000 Web pages each month with its Internet measurement services, and managed 210 Web and mobile private agent appliances on behalf of its customers.

The company's Internet solutions also offer custom engagements that combine its proprietary software technology with its consulting expertise to provide online businesses with research and actionable insight about their Websites with respect to load and capacity problems, online customer satisfaction and usability issues, and industry/competitive comparisons, and trends. It conducts load and capacity tests on its customer's Websites by driving Web traffic generated by its load testing agent infrastructure, measuring performance under load, and diagnosing capacity bottlenecks. It conducts online customer satisfaction and usability research using 'private panels' recruited for specific customer projects. Through task-based testing, observation of natural customer behavior, online surveys and remote usability testing, Keynote consultants enable its customers to answer questions regarding customer behavior.

The company offers its Internet professional services either on a subscription or on an engagement basis although, in some cases, it also offer Internet professional services on per incident or per study basis.

The company's Mobile services are based on a worldwide infrastructure of distributed mobile devices, both simulated and real, placed on behalf of key mobile service providers and content companies that benchmark, monitor, and test the performance and quality of those services from multiple regional markets. In addition, it offers the SIGOS Global Roamer 'on demand' solution of its SIGOS SITE system to major mobile providers and telecommunications carriers to actively test and monitor the quality of their mobile roaming partners' voice and data networks. It also licenses the SIGOS SITE system, which consists of hardware 'probes' built by the company along with its proprietary testing and monitoring software, to major mobile providers and telecommunications carriers for the purpose of testing the end-to-end quality of a mobile network, content and services, and for diagnosing problems that need to be fixed by its customers or their partners in order to ensure a satisfactory user experience for their mobile users. The company's Mobile solutions are offered on both a subscription basis and a license basis.

Internet

The company's Internet subscriptions and professional service engagements enable enterprises to monitor key technical performance metrics in order to benc

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
