## Abstracts

King Pharmaceuticals Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between King Pharmaceuticals Inc. and its competitors. This provides our Clients with a clear understanding of King Pharmaceuticals Inc. position in the Industry.

The report contains detailed information about King Pharmaceuticals Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for King Pharmaceuticals Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The King Pharmaceuticals Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes King Pharmaceuticals Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of King Pharmaceuticals Inc. business.

### **About King Pharmaceuticals Inc.**

King Pharmaceuticals, Inc. engages in the research, development, manufacture, marketing, and sale of branded prescription pharmaceutical products and animal health products worldwide. The company's branded prescription pharmaceuticals include neuroscience products (primarily pain medicines), hospital products, and legacy brands. The animal health business is focused on medicated feed additives (MFAs) and water-soluble therapeutics primarily for poultry, cattle, and swine.

The company markets its branded prescription pharmaceutical products primarily through a sales force to general/family practitioners, internal medicine physicians, neurologists, pain specialists, surgeons and hospitals across the United States and in Puerto Rico.

### **Segments**

The company's segments include Branded Prescription Pharmaceuticals; Animal Health; Meridian Auto-Injector; and Royalties and other.

### **BRANDED PRESCRIPTION PHARMACEUTICALS SEGMENT**

The company markets various branded prescription pharmaceutical products that are divided into categories, including neuroscience (including Skelaxin, Flector Patch, Avinza and Embeda); hospital (including Thrombin-JMI), and legacy products (including Levoxyl, Bicillin, Altace, and Cytomel).

## Neuroscience

Products in this category are primarily marketed to primary care physicians, neurologists, orthopedic surgeons and pain specialists.

**Skelaxin:** A muscle relaxant tablet indicated for the relief of discomfort associated with acute, painful musculoskeletal conditions.

**Flector Patch:** A topical non-steroidal anti-inflammatory patch for the treatment of acute pain due to minor strains, sprains and contusions.

**Avinza:** A long-acting formulation of morphine indicated as a once-daily treatment for moderate to severe pain in patients who require continuous, around the clock opioid therapy for an extended period of time.

**Embeda:** A long-acting Schedule II opioid analgesic for the management of moderate-to-severe pain when a continuous, around-the-clock opioid analgesic is needed for an extended period of time. Embeda contains pellets of an extended-release oral formulation of morphine sulfate, an opioid receptor agonist, surrounding an inner core of naltrexone hydrochloride, an opioid receptor antagonist.

## Hospital

Products in this category are primarily marketed to hospitals.

**Thrombin-JMI:** A chromatographically purified topical (bovine) thrombin solution indicated as an aid to hemostasis whenever oozing blood and minor bleeding from capillaries and small venules is accessible.

## Legacy Branded

**Levoxyl:** Color-coded, potency-marked tablets indicated for thyroid hormone replacement or supplemental therapy for hypothyroidism.

**Bicillin:** A penicillin-based antibiotic suspension for deep muscular injection indicated for the treatment of infections due to penicillin-G-susceptible microorganisms.

**Altace:** An oral administration indicated for the treatment of hypertension and reduction of the risk of stroke, myocardial infarction (heart attack) and death from cardiovascular causes in patients 55 and over with either a history of coronary artery disease, stroke or peripheral vascular disease or with diabetes and one other cardiovascular risk factor (such as elevated cholesterol levels or cigarette smoking). Altace is also indicated in stable patients who have demonstrated clinical signs of congestive heart failure after sustaining an acute myocardial infarction.

**Cytomel:** A tablet indicated in the medical treatment of hypothyroidism.

## ANIMAL HEALTH SEGMENT

This segment engages in the development, registration, manufacture and marketing of MFAs and water soluble therapeutics, primarily for poultry, cattle and swine. In this business, it makes anti-infectives that are added to the feed and water of livestock and poultry.

The anti-infective market consists of various categories, including antibiotic products (including Albac, Aureomycin, Aureomycin-combination products, Aurofac, Chlormax and BMD); anticoccidial products (including Bio-Cox, Cygro, Bovatec, Avatec, Deccox, Robenz, Cycostat, and Rofenaid); and antibacterial products (including 3-Nitro and Histostat).

In addition

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
