The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kingstone Companies, Inc. business.

About Kingstone Companies, Inc.

Kingstone Companies, Inc., through its subsidiary, Kingstone Insurance Company (KICO), offers property and casualty insurance products to small businesses and individuals in New York State.

The company has developed online application raters and inquiry systems for its personal lines and commercial automobile products. It writes business through independent agents and brokers.

Product Lines

Personal lines - The company's principal line of business is personal lines consisting of homeowners, dwelling fire, 3-4 family dwelling package, condominium, renters, mechanical breakdown, and personal umbrella policies.

Commercial automobile – The company's commercial automobile policies consist primarily of vehicles weighing approximately 50,000 pounds owned by small contractors and artisans.

For-hire vehicle physical damage only policies - These policies are designed for newer

vehicles utilized as black cars (limousines), yellow taxicabs and car service vehicles. No vehicle older than 4 years is written in the program.

Private passenger physical damage - The company writes policies for private passenger physical damage coverage under a product called Basic Auto. It also writes a standard physical damage only product (PDO). These products are designed to be companion products with a New York Automobile Insurance Plan liability policy that is sold to insureds.

General liability policies - The company writes business owners policies (BOP). The BOP business consists primarily of small business retail risks without a cooking or residential exposure. It also writes artisan's liability policies.

Canine legal liability policies - These policies cover bodily injury, property, damage, and medical payments for damages caused by the insured's dog.

Dispositions

New York Locations: In April 2009, the company sold the assets, including the book of business, of the 16 retail business locations that the company owned in New York State.

Pennsylvania Locations: In June 2009, the company sold the stock of the subsidiary that operated its three remaining Pennsylvania store.

Franchise Business: In May 2009, the company sold the stock of the subsidiaries that operated its DCAP franchise business.

History

The company was founded in 1961. It was formerly known as DCAP Group, Inc. and changed its name to Kingstone Companies, Inc. in 2009.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
