## **Abstracts**

Kinross Gold Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Kinross Gold Corporation and its competitors. This provides our Clients with a clear understanding of Kinross Gold Corporation position in the Industry.

The report contains detailed information about Kinross Gold Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Kinross Gold Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Kinross Gold Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Kinross Gold Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kinross Gold Corporation business.

## **About Kinross Gold Corporation**

Kinross Gold Corporation engages in the mining and processing of gold and, as a by-product, silver ore and the exploration for, and the acquisition of, gold bearing properties in the Americas, the Russian Federation, and worldwide. The principal products of Kinross are gold and silver produced in the form of dore that is shipped to refineries for final processing.

As of December 31, 2009, the company's proven and probable mineral reserves were 51.0 million ounces of gold, 102.9 million ounces of silver, and 2.9 billion pounds of copper.

### **Properties**

#### **Fort Knox Open Pit**

The Fort Knox open pit mine, mill, and mineral claims cover approximately 21,197 hectares located 40 kilometers northeast of the City of Fairbanks, Alaska. The company controls 1,339 State of Alaska mining claims covering an area of approximately 17,427 hectares; an additional 519 hectares of mineral rights comprising an Upland Mineral Lease issued by the state of Alaska; 2,984 hectares of leased private land, one leased

federal mining claim; and 22 unpatented federal lode mining claims.

### Gil Property

The Gil property mineral claims cover approximately 2,521 hectares located contiguous to the Fort Knox claim block. The claim block consists of 182 State of Alaska mining claims and is subject to a joint venture agreement between Kinross and Teryl. The company's ownership interest in the Gil claim block is 80%.

### Paracatu, Brazil

The company is the owner of the Paracatu mine located in the northwestern portion of the Minas Gerais State in Brazil. The Paracatu mine includes an open pit mine, process plant, tailings dam area and related surface infrastructure. The Paracatu mine is 100% owned and operated by its wholly-owned subsidiary Rio Paracatu Mineracao S.A. (RPM).

The Paracatu mine is an open pit mine located two kilometers north of the city of Paracatu, situated in the northwestern portion of Minas Gerais State, 230 kilometers southeast of the national capital Brasília and 480 kilometers northwest of the state capital Belo Horizonte. RPM holds title to three mining licenses totaling 1,304 hectares. RPM holds title to 12 exploration concessions (6,132 hectares) in the immediate mine area and has applied for title to an additional exploration concession (1,030 hectares) in the Paracatu area. In addition to the RPM exploration concessions, Kinross Exploration Brazil holds title to 18 exploration concessions (35,880 hectares) in the area of the mine.

### Maricunga, Chile

The Maricunga heap leach mine is owned and operated by Compania Minera Maricunga (CMM), a Chilean company that is 100% owned by the company. The Maricunga property is located in the Maricunga District of the Region III of Chile, 120 kilometers due east of the town of Copiapo. Mining claims total 6,770 hectares, while the exploration properties held by CMM include 2,100 hectares. In addition to the mineral claim rights, CMM also holds title to surface rights at Maricunga, providing the land required for the leach pads, waste dumps, camp and other facilities.

### Kupol mine, Russian Federation

The company's 75% (less one share) interest in the high grade Kupol gold and silver project in the northeast region of the Russian Federation is held through a commensurate interest in Chukotka Mining & Geological Company (CMGC). The property comprises a 7.8 square kilometer license for subsoil use for geological study and production of gold and silver. The Kupol deposit is located in the northwest part of the Anadyr foothills on the boundary between the Anadyr and Bilibino Regions in the Chukotka Autonomous Okrug.

#### Cerro Casale, Chile

The Cerro Casale project is located in Chile. The company and Barrick Gold Corporation (Barrick) each hold a 50% interest in the porphyry copper deposit. The Cerro Casale project is owned by Compania Minera Casale (CMC), a contractual mining company formed under the laws of the Republic of Chile. CMC owns 33 claim groups containing 4,239 exploitation claims and totaling 20,421 hectares. CMC holds permits for 17 wells drilled at Piedra Pomez with a total yield of 1,237.62 liters per second.

#### Fruta del Norte, Ecuador

The company wholly owns t

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
