The Kubota Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Kubota Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kubota Corporation business.

About Kubota Corporation

Kubota Corporation manufactures a range of machinery and other industrial and consumer products, including farm equipment, engines, construction machinery, pipe-related products, environment-related products, and industrial castings.

The company's farm equipment, construction machinery, ductile iron pipe, and certain other products are sold both in Japan and in overseas markets, which consist mainly of North America, Europe, and Asia.

Segments

The company's segments include Farm & Industrial Machinery; Water & Environment Systems; Social Infrastructure; and Other.

Farm & Industrial Machinery

This segment includes farm equipment, engines and construction machinery. Kubota manufactures farm equipment and small engines for agricultural use. Main products include tractors ranging from 10.5 to 135 horsepower, combine harvesters, rice transplanters, power tillers and reaper binders. The company also manufactures and

sells a line of construction machinery, including mini-excavators and wheel loaders, as well as engines for various industrial uses.

The products in this segment are manufactured at six domestic plants, and the company has manufacturing subsidiaries in the United States, Germany, China, Thailand, Indonesia, and Vietnam.

Water & Environment Systems

This segment consists of pipe-related products and environment-related products. Pipe-related products consist of ductile iron pipes, plastic pipes and fittings, and various valves. Most of these products are sold to local and national governments and public utilities for use principally in water supply and sewage systems along with industrial water supply, as well as gas supply, telecommunication, and irrigation systems.

Environment-related products consist of environmental control plants, pumps and related engineering. The company supplies water and sewage treatment plants, submerged membrane systems and biogas production systems for water treatment. It also supplies pulverizing facilities for solid waste treatment and various pumps for waterworks, sewage facilities, irrigation system, rainwater drainage, and power supplies.

Social Infrastructure

This segment consists of industrial castings, spiral welded steel pipes, vending machines, electronic-equipped machinery, and air-conditioning equipment. The products in this segment are manufactured at six plants in Japan and manufacturing subsidiaries in Canada and Indonesia.

Other

This segment consists of construction, services, and other businesses. Most of the products and services of this segment are directly sold to other companies and public entities.

Overseas Activities

The company has manufacturing subsidiaries in the U.S.A., Canada, Germany, China, Indonesia, Thailand, and Vietnam and manufacturing affiliates in China and India.

International sales subsidiaries are located in the U.S.A., Canada, France, the U.K., Germany, Spain, Australia, China, South Korea, and India. In addition, liaison offices are located in Torrance (California: U.S.A.), Flowery Branch (Georgia : U.S.A.), London (the U.K.), Argenteuil (France), Dubai (U.A.E.), Beijing (China), Suzhou (China), Bangkok (Thailand), Navanakorn (Thailand), Chonburi (Thailand), Selangor (Malaysia), Cairo (Egypt), Delhi (India), Singapore (Singapore), and Quezon City (The Philippines).

History

Kubota Corporation was founded in 1890.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
