The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kyzen Corp. business.

About Kyzen Corp.

Kyzen Corporation provides precision cleaning products for electronics and high-technology manufacturing operations.

The company uses various cleaning technologies that include Spray-in-Air (Batch & In-Line), Stencil & Misprint Washing, Spray-under-Immersion (Batch & In-Line), Vapor Phase Cleaning, Ultrasonic Immersion (Multiple Frequencies), Centrifugal Immersion, and Semiconductor Wafer Processing (Rotary & In-Line).

Product Lines

Aquanox

Aquanox A4512P is an aqueous electronic assembly cleaning fluid designed for low VOC sensitive areas such as Southern California.

Aquanox A4512US is an engineered cleaning fluid for removing flux residue from electronic assemblies and peripherals in aqueous immersion and ultrasonic cleaning systems.

Aquanox A4520 is an engineered cleaning fluid for removing flux residue from electronic

assemblies in aqueous cleaning systems.

Aquanox A4615US is an aqueous amine blend designed for removing flux residue from electronic assemblies and peripherals in aqueous immersion and ultrasonic cleaning systems.

Cybersolv

Cybersolv 141-R is an all-purpose solvent in an aerosol can that is used for benchtop rework applications.

Cybersolv C3400 is an all-purpose solvent cleaner that is used on aluminum, ferrous, brass, titanium, ceramics, glass, and most plastics & rubbers for the removal of organic soils.

Ionox

Ionox BC is an engineered alcohol based cleaning fluid for removing flux residue from printed circuit assemblies in bench top, hand wipe and immersion processes.

Ionox FCR is an engineered alcohol based cleaning fluid for removing flux residue from printed circuit assemblies, in semi-aqueous spray-under-immersion, centrifugal, and ultrasonic cleaning systems.

KYZEN

KYZEN Booster 20 is a sump-side additive that enhances performance for those hard to clean applications.

KYZEN Booster 6 is a maintenance sump-side additive used to extend sump life of Kyzen brominated vapor degreasing products.

LONOX

LONOX L5005 is a mild alkaline aqueous amine blend specially designed for effectiveness on removing all types of flux and paste residues from stencils.

LONOX L5020 is a high alkaline aqueous amine blend specially designed for effectiveness on removing all types of flux residues from wiring assemblies.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
