## Abstracts

L & L Energy, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between L & L Energy, Inc. and its competitors. This provides our Clients with a clear understanding of L & L Energy, Inc. position in the [Energy](#) Industry.

The report contains detailed information about L & L Energy, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for L & L Energy, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The L & L Energy, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes L & L Energy, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of L & L Energy, Inc. business.

### **About L & L Energy, Inc.**

L&L Energy, Inc., through its subsidiaries, engages in coal mining, coal washing, coal coking, and coal wholesaling. The company's operations are conducted in Yunnan and Guizhou provinces in the southwest region of the People's Republic of China.

#### Operations

##### Coal Mining

The company has rights in three coal mines, including DaPuAn Mine; SuTsong Mine; and Ping Yi Mine.

**DaPuAn Mine:** The company extracts coal at rate of approximately 250,000 tons per year from this mine. The total reserve of this mine is 7.8 million tons.

**SuTsong Mine:** The company extracts coal at rate of approximately 130,000 tons per year from this mine. The total reserve of this mine is 2.1 million tons.

**Ping Yi Mine:** The company extracts coal at rate of approximately 250,000 tons per year from this mine. The total reserve of this mine is 13.5 million tons.

## Coal washing

The company has three coal washing facilities with an aggregate 1 million ton annual capacity. One facility is on the site of the DaPuAn mine, another facility is on the site of Ping Yi Mine, and Hong Xing is free-standing. The company washes coal produced from its own mining operation and coal that it purchases from other coal suppliers. Coal washing process involves crushing coal and washing out soluble sulfur and ash compounds with water or other solvents.

## Coal coking

The company's facilities produce metallurgical coke, which is higher quality coke used primarily for steel manufacturing. Lesser quality coke is burned in electricity-generating plants. It has 1 coking facility with a 150,000 ton capacity per year.

## Coal wholesaling

The company buys and sells coal from and to others using two coal storage facilities with railroad access. It also acts as broker to assist small independent mine operators who lack the means to transport coal from their mines or are otherwise unable to sell their coal themselves.

## Acquisitions

In February 2010, the company acquired 100% equity of ZoneLin Coal Coking Factory in China (ZoneLin). In January 2010, the company acquired 100% equity of SeZone County Hong Xing Coal Washing Factory (Hong Xing).

## Dispositions

In April 2010, the company sold its interest in Hon Shen Coal Co. Ltd.

In 2009, the company has discontinued its air compressor operations.

## History

The company was founded in 1995. It was formerly known as L & L International Holdings, Inc. and changed its name to L&L Energy, Inc. in January 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
