The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of La Mancha Resources, Inc. business.

About La Mancha Resources, Inc.

La Mancha Resources Inc., through its subsidiaries, engages in the exploration, development, and production of gold properties.

The company operates two producing gold mines in Africa, and a third in Australia with the start-up of production at the Frog's Leg underground mine project. La Mancha also has one other mining project under development in Australia, and holds a portfolio of approximately 30 exploration projects in Africa, Australia and Argentina. The company conducts gold mining operations and/or exploration in Argentina, Sudan, the Ivory Coast and Australia.

Australia

The Frog's Leg mine has generated 15,375 ounces of gold for La Mancha. La Mancha is the mine operator and has entered into a toll-milling agreement with the nearby Green field plant to secure milling availability for scheduled periods throughout the year. At the White Foil project, during 2008, 1,910 ounces of gold were recovered from the broken ore inventory. A total of 24,630 tonnes of ore were milled.

Sudan

The Hassaï mine produced a total of 73,175 ounces of gold in 2008. Approximately 16,900 meters of resource development drilling were completed at the Ity mine during 2008.

Cote d'Ivoire

In 2008, approximately 16,900 meters of resource development drilling were completed at the Ity mine.

Ivory Coast

During 2008, the company started an exploration campaign in the North-east portion of the Zia extension area.

Joint Ventures

The company's gold mining operations in Sudan are carried out through its 40% joint venture interest in Ariab Mining Company, domiciled in Sudan (AMC) and its operations in Cte d'Ivoire are carried out through its 45.9% joint venture interest in Societe des Mines d'Ity, domiciled in Cte d'Ivoire (SMI). In addition, the company, through La Mancha Resources Australia Pty Ltd, domiciled in Australia (LMRA), carries out some exploration and mining operations in Australia.

History

La Mancha Resources Inc. was founded in 1996.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
